Data in Many Forms ...

Statistics Canada disseminates data in a variety of forms. In addition to publications, both standard and special tabulations are offered on computer print-outs, microfiche and microfilm, and magnetic tapes. Maps and other geographic reference materials are available for some types of data. Direct access to aggregated information is possible through CANSIM, Statistics Canada's machine-readable data base and retrieval system.

How to Obtain More Information

Inquiries about this publication and related statistics or services should be directed to:

Goods and Services Producing Industries Section,
Prices Division,

Statistics Canada, Ottawa, K1A 0T6 (Telephone: 990-9607) or to the Statistics Canada reference centre in:

St. John's	(772-4073)	Sturgeon Falls	(753-4888)
Halifax	(426-5331)	Winnipeg	(983-4020)
Montréal	(283-5725)	Regina	(780-5405)
Ottawa	(990-8116)	Edmonton	(420-3027)
Toronto	(973-6586)	Vancouver	(666-3691)

Toll-free access is provided in all provinces and territories, **for users who reside outside the local dialing area** of any of the regional reference centres.

Newfoundland and Labrador	1-800-563-4255
Nova Scotia, New Brunswick and Prince Edward Island	1-800-565-7192

Des données sous plusieurs formes ...

Statistique Canada diffuse les données sous formes diverses. Outre les publications, des totalisations habituelles et spéciales sont offertes sur imprimés d'ordinateur, sur microfiches et microfilms et sur bandes magnétiques. Des cartes et d'autres documents de référence géographiques sont disponibles pour certaines sortes de données. L'accès direct à des données agrégées est possible par le truchement de CANSIM, la base de données ordinolingue et le système d'extraction de Statistique Canada.

Comment obtenir d'autres renseignements

Toutes demandes de renseignements au sujet de cette publication ou de statistiques et services connexes doivent être adressées à:

Section des industries de biens et de services,
Division des prix,

Statistique Canada, Ottawa, K1A 0T6 (téléphone: 990-9607) ou au centre de consultation de Statistique Canada à:

St. John's	(772-4073)	Sturgeon Falls	(753-4888)
Halifax	(426-5331)	Winnipeg	(983-4020)
Montréal	(283-5725)	Regina	(780-5405)
Ottawa	(990-8116)	Edmonton	(420-3027)
Toronto	(973-6586)	Vancouver	(666-3691)

Un service d'appel interurbain sans frais est offert, dans toutes les provinces et dans les territoires, **aux utilisateurs qui habitent à l'extérieur des zones de communication locale** des centres régionaux de consultation.

Highlights

Industrial Product Price Index (IPPI)

Preliminary figures indicate that the Industrial Product Price Index (IPPI, 1981 = 100) advanced by 0.3% in July 1987. This monthly increase was largely the result of the price increases observed for intermediate goods in the wood, paper, primary metals and chemicals sectors. Only the 1.3% appreciation of the Canadian dollar in relation to the American dollar, by reducing the value in Canadian dollars of export products quoted in American currency, had a significant negative effect on the overall index.

Although, at 3.4%, the year-over-year advance of the IPPI from July 1986 to July 1987 was only slightly higher than in May (3.0%) and June (3.2%), it was still at its highest level since March 1985. Yearly rates of change much higher than that registered for the total IPPI were recorded for fish products (18.0%), wood pulps (22.0%), copper (15.4%), lead (58.9%) and primary refined non-ferrous metals (21.1%).

The price index for lumber, sawmill and other wood products rose by 1.3% in July 1987, up 4.7% from July 1986. Despite a slight decline in prices for the domestic market (-0.6%), the price index for softwood lumber rose by 1.5% in July, owing to the 2.4% rise in export-market prices. After dropping 18.0% between January and June 1987, the index for softwood plywood and veneer rose 4.8% in July. Significant price increases were also observed for wood shingles (8.1%), wooden construction moulding (2.8%) and particle board (2.4%).

The price index for newsprint paper rose 4.7% in July 1987, largely as a result of the increase in prices for exports to the United States. This index was 10.3% higher in July 1987 than in July 1986.

The price index for primary metal products advanced 0.8% in July 1987, posting a sixth straight monthly increase. The monthly advance resulted primarily from the increases of 3.6% in the index for ferrous and non-ferrous metal scrap, 2.7% in the index for aluminum products, and 3.2% in the index for copper products.

The price index for chemicals and chemical products rose 0.8% in July 1987, pushed up mainly by increases of 2.1% in the index for synthetic resins and 1.6% in the pharmaceuticals index. The year-over-year advance of the index for synthetic resins was 6.3% in July 1987, with phenol-formaldehyde resins and polystyrene resins, up 24.6% and 18.1% respectively from July 1986, being some of the largest contributors.

The price index for autos, trucks and other transport equipment dropped by 0.4% in July 1987, to stand at a level slightly lower than a year earlier (-0.1%). The negative impact of the rise in the Canadian dollar against its US counterpart has been partially compensated by the reduction of some cash rebates offered by the car manufacturers.

Preliminary estimates indicate that the price index for petroleum and coal products rose 0.4% in July 1987, largely as a result of the increases for products such as lubricating oils and greases and asphalt. These estimates also indicate that, at 1.7%, the year-over-year movement of this index was upward for the first time since January 1986.

Faits saillants

Indice des prix des produits industriels (IPPI)

D'après les chiffres préliminaires, l'indice des prix des produits industriels (IPPI, 1981 = 100) a progressé de 0.3% au mois de juillet 1987. Cette hausse mensuelle a découlé en majeure partie des augmentations de prix observées pour les produits semi-finis dans les secteurs du bois, du papier, des métaux de première transformation et des produits chimiques. Seule la hausse de 1.3% du dollar canadien par rapport à la devise américaine, en diminuant la valeur en dollars canadiens des produits exportés cotés en dollars américains, a exercé un impact négatif significatif sur l'indice d'ensemble.

La progression annuelle de l'IPPI, de juillet 1986 à juillet 1987, s'est établie à 3.4%, soit à un niveau légèrement supérieur à ceux enregistrés en mai (3.0%) et en juin (3.2%). La progression annuelle de l'IPPI n'avait toutefois pas atteint un tel niveau depuis mars 1985. Des taux de variation annuels largement supérieurs à la moyenne de l'IPPI furent enregistrés pour les produits du poisson (18.0%), les pâtes de bois (22.0%), le cuivre (15.4%), le plomb (58.9%) et les profilés d'affinage de métaux non-ferreux (21.1%).

L'indice des prix des sciages et des produits de scierie a augmenté de 1.3% au mois de juillet 1987, en hausse de 4.7% par rapport à juillet 1986. Malgré un léger repli des prix sur le marché intérieur (-0.6%), l'indice des prix du bois résineux de construction s'est accru de 1.5% en juillet grâce à la poussée de 2.4% des prix sur les marchés d'exportation. Après avoir décliné de 18.0% entre janvier et juin 1987, l'indice des placages et des contre-plaqués de bois résineux a augmenté de 4.8% au mois de juillet. Des hausses de prix significatives furent également observées pour les bardeaux en bois (8.1%), les moulures en bois pour la construction (2.8%) et les panneaux de particules (2.4%).

L'indice des prix du papier journal s'est accru de 4.7% au mois de juillet 1987, en raison surtout de l'accroissement des prix des exportations à destination des États-Unis. Cet indice se situe maintenant à un niveau de 10.3% supérieur à celui de juillet 1986.

L'indice des prix des produits métalliques primaires a progressé de 0.8% en juillet 1987, enregistrant ainsi une sixième hausse mensuelle consécutive. La progression mensuelle a résulté principalement des accroissements de 3.6% de l'indice des déchets de métaux ferreux et non-ferreux, de 2.7% de l'indice des produits de l'aluminium et de 3.2% de l'indice des produits du cuivre.

L'indice des prix des produits chimiques s'est accru de 0.8% au mois de juillet 1987, sous l'impulsion principalement des hausses de 2.1% de l'indice des résines synthétiques et de 1.6% de l'indice des produits pharmaceutiques. D'une année à l'autre, la progression de l'indice des résines synthétiques s'établit maintenant à 6.3%, avec notamment les résines de phénol-formaldéhyde et de polystyrène en hausse de 24.6% et de 18.1% respectivement par rapport à juillet 1986.

L'indice des prix des voitures, camions et autre matériel de transport a diminué de 0.4% en juillet 1987, pour se retrouver à un niveau légèrement inférieur à celui de juillet 1986 (-0.1%). L'impact négatif de la hausse du dollar canadien par rapport à la devise américaine fut en partie compensé par la réduction de certains rabais consentis par les fabricants d'automobiles.

Selon les premières estimations, l'indice des prix des produits du pétrole et du charbon a augmenté de 0.4% au mois de juillet 1987, en raison surtout des hausses des produits tels les huiles et graisses de lubrification et l'asphalte. À 1.7%, la progression annuelle de cet indice s'est pour la première fois inscrite en hausse depuis janvier 1986.

Highlights

Raw Materials Price Index

Preliminary estimates show the Raw Materials Price Index (RMPI, 1981 = 100) increased 0.9% between June and July to a level of 105.1. This monthly increase was almost entirely the result of a 3.0% increase for the mineral fuels component. Over the year, the RMPI increased 16.4%. Excluding the mineral fuels component, the RMPI registered a decreased of 0.7% and only increased 5.6% over the year. Of the seven components making up the Raw Materials Price Index, four showed increases while three registered decreases.

The mineral fuels component index was estimated to have increased 3.0% in July. In July 1986 the component index was at its lowest level since January 1981. At a level of 99.1, the July 1987 index was 34.8% higher than the low level of 12 months ago. Crude oil prices were estimated to have increased 4.1% in July to a level 46.9% higher than a year ago. Natural gas decreased 1.3% in July while thermal coal declined 0.8%.

The index for the non-ferrous metals component increased 1.8% over the month to a level 15.0% higher than a year earlier. Significant monthly increases were registered for copper (3.0%), lead (6.3%) and other base metals (1.8%). Over the year, copper was up 18.8% and lead was up 59.9%. While precious metals were down 0.6% in July, they were up 23.8% over the year. Gold, silver and platinum have registered year-to-year increases ranging from 22% to 47%.

The vegetable products component index decreased 2.6% in July to a level of 84.7. Grains were down 4.9% in the month as decreases were registered for wheat, barley, buckwheat, corn and oats. The grain index was 10.6% below its year earlier level. Oilseeds declined 2.0% in July mainly because of price decreases for rapeseed and flaxseed. The index for cocoa, coffee and tea was 5.8% lower in July than in June and 49.3% below its January 1986 peak.

A 1.5% decrease was registered for the animal and animal products component index. Despite the monthly decrease the component was 6.1% higher than its level a year ago. Cattle and calves prices decreased 1.8% over the month. This index was 12.4% above its level a year ago in spite of the monthly decrease. Hog prices were down 4.9% over the month and down 1.8% over the year. Fish prices increased 1.7% in July to a level 13.1% higher than in July 1986.

While the wood component index only increased 0.2% over the month, it was up 7.6% over the year. Year-over-year increases were registered for logs and bolts (9.9%) and for pulpwood (4.2%).

Faits saillants

Indice des prix des matières brutes

Selon les chiffres préliminaires, l'indice des prix des matières brutes (IPMB, 1981 = 100) a augmenté de 0.9% entre juin et juillet pour s'établir à 105.1. L'augmentation mensuelle fut presque entièrement attribuable à la hausse de 3.0% de la composante des combustibles minéraux. D'une année à l'autre, l'IPMB a augmenté de 16.4%. Si l'on exclut la composante des combustibles minéraux, l'IPMB a diminué de 0.7% par rapport à juin, et l'augmentation annuelle n'a eté que de 5.6%. Des sept composantes de l'indice des prix des matières brutes, quatre ont augmenté alors que trois ont diminué.

L'indice de la composante des combustibles minéraux a augmenté de 3.0% en juillet. En juillet 1986, cet indice avait atteint son niveau le plus bas depuis janvier 1981. Établi à 99.1, l'indice de juillet 1987 est supérieur de 34.8% au niveau atteint il y a 12 mois. Le prix des huiles minérales brutes a augmenté de 4.1% en juillet et de 46.9% depuis un an. Le gaz naturel a diminué de 1.3% en juillet et le charbon thermique a accusé une baisse de 0.8%.

L'indice de la composante des métaux non ferreux a augmenté de 1.8% durant le mois pour se situer à un niveau de 15.0% supérieur à celui de l'année précédente. Des augmentations mensuelles significatives ont été relevées pour le cuivre (3.0%), le plomb (6.3%) et les autres métaux non-ferreux (1.8%). En un an, la hausse du cuivre a été de 18.8%, et celle du plomb, de 59.9%. Les métaux précieux ont accusé une baisse de 0.6% en juillet, mais ont augmenté de 23.8% en un an. D'une année à l'autre, les augmentations de l'or, de l'argent et du platine ont varié de 22% à 47%.

L'indice de la composante des substances végétales a diminué de 2.6% en juillet pour s'établir à 84.7. Les céréales ont accusé une baisse de 4.9% durant le mois en raison des diminutions du blé, de l'orge, du sarazin, du maïs et de l'avoine. L'indice des céréales était inférieur de 10.6% à celui de l'année précédente. Les oléagineux ont diminué de 2.0% en juillet en raison surtout de la baisse des prix du colza et du lin. En juillet, l'indice du cacao, du café et du thé était inférieur de 5.8% à celui de juin et accusait une baisse de 49.3% par rapport au sommet atteint en janvier 1986.

L'indice de la composante des animaux et des substances animales a diminué de 1.5%. Malgré cela, le niveau de la composante a augmenté de 6.1% par rapport à celui atteint il y a un an. Les prix des bovins et des veaux ont diminué de 1.8% en un mois. Malgré cette baisse, l'indice s'est établi à 12.4% de plus qu'il y a un an. Le prix des porcs a accusé une baisse de 4.9% en un mois et de 1.8% pour l'année. Le prix du poisson a augmenté de 1.7% en juillet et de 13.1% depuis juillet 1986.

L'indice de la composante du bois n'a augmenté que de 0.2% en un mois, mais il a augmenté de 7.6% en un an. D'une année à l'autre, les billes et les billots ont augmenté de 9.9% et le bois à pâte de 4.2%.

	Mineral fuels – Combustibles minéraux	99.1	96.2	3.0	9.0	34.8

(1) Revised.
(1) Revisé.
(2) The aggregation of indexes by commodities or by industries should produce the same grand total. When these totals occasionally differ due to rounding, the All Commodities Index shall be regarded as authoritative, and the All Manufacturing Industries is adjusted to match.
(2) L'agrégation des indices par produits ou par industries devraient résulter en un même grand total. Lorsque ces totaux diffèrent occasionnellement en raison de l'arrondissement, l'indice total - tous les produits devra être considéré comme celui qui fait autorité, et l'indice total - toutes les industries manufacturières sera posé égal.

Note: Indexes for the most recent six months shown are subject to revision.

Nota: Les indices figurant pour les six mois les plus récents sont sujets à révision.

(1) The bottom line in each series title block may contain, in order from left to right, the following: the CANSIM Databank code number (d nnnnnn), a numeric descriptor, a coverage measure, and a variability measure. The numeric descriptor is of the order ss-mm-nn-pppp-rr where
ss indicates the S-level commodity code (from 9 to 28)
mm indicates the M-level commodity code (from 14 to 43, 45 to 69)
nn indicates either a split of the M-level commodity,
or 91, which indicates a special aggregation
or 99, which indicates special details.
pppp indicates the PCG code (except for some special aggregations which include several PCGs).
rr indicates a split of a PCG.
The coverage measure for an elemental index is a symbol: E indicates a fully designed sample, S indicates an abbreviated sample, P indicates an indirect estimate. For a composite index the percentage of the coverage which is estimated from direct surveys (E + S) is given; occasionally these coverage measures are rounded to the nearest 5% to preserve confidentiality. The variability measure is given for some indexes to indicate the relative stability of the index estimate due to sampling. The most stable indexes are marked A, the least stable, D. For further information order Industrial Product Price Indexes 1981 = 100, Concepts and Methods (Catalogue No. 62-556).

(1) En lisant de gauche à droite, la ligne en-dessous de chaque titre des séries présente, en tout ou en partie, l'information suivante: le numéro de code "Databank" de CANSIM (D nnnnnn), un numéro d'identification numérique, une mesure du degré de couverture et une mesure de la variabilité.
Le numéro d'identification numérique prend la forme générale ss-mm-nn-pppp-rr où:
ss indique le code du niveau S des produits (de 9 à 28)
mm indique le code du niveau M des produits (de 14 à 43, 45 à 69)
nn indique soit une composante du niveau M des produits, ou prend la valeur de 91 pour les agrégats spéciaux, ou de 99 pour les indices particuliers.
pppp indique le code GPP (sauf pour certains agrégats spéciaux qui comprennent plusieurs GPP)
rr indique une composante d'un GPP.
La mesure du degré de couverture pour les indices élémentaires est présentée à l'aide d'un symbole: E indique un échantillonnage exhaustif, S indique un échantillonnage sommaire et P indique une estimation indirecte. Pour les indices composites, la donnée en pourcentage représente une estimation du degré de couverture par échantillonnage direct (E + S). Ces mesures du degré de couverture sont parfois arrondies au 5% le plus près afin d'assurer la confidentialité. La mesure de la variabilité, donnée pour un certain nombre d'indices, indique la stabilité relative de l'indice en tant qu'estimation basée sur un échantillon. Les indices les plus stables sont cotés A, les moins stables, D. Pour plus de renseignements, commandez le document de référence: Indices des prix des produits industriels 1981 = 100, concepts et méthodes (n° 62-556 au catalogue).

Note: Indexes for the most recent six months shown are subject to revision.

Nota: Les indices figurant pour les six mois les plus récents sont sujets à révision.

(1) The aggregation of indexes by commodities or by industries should produce the same grand total. When these totals occasionally differ due to rounding, the All Commodities Index shall be regarded as authoritative, and the All Manufacturing Industries is adjusted to match.

(1) L'agrégation des indices par produits ou par industries devraient résulter en un même grand total. Lorsque ces totaux diffèrent occasionnellement en raison de l'arrondissement, l'indice total - tous les produits devra être considéré comme celui qui fait autorité, et l'indice total - toutes les industries manufacturières sera posé égal.

(2) The numeric code to the right of the CANSIM databank number on the last line of each series is the 1980 Standard Industrial Classification (SIC) code. An explanation of the percentage figures (coverage measure) shown to the right of the SIC can be found at the end of Table 2. These coverage measures are rounded to the nearest 5%, to preserve confidentiality.

(2) Le code numérique à la droite du numéro Databank de CANSIM apparaissant à la ligne du bas de chaque série est le code de la Classification type des industries (CTI) de 1980. Une explication des données en pourcentage (mesure de degré de couverture) apparaissant à la droite du code CTI est disponible à la fin du tableau 2. Ces mesures de degré de couverture sont arrondies au 5%, le plus près afin de préserver la confidentialité.

TABLE 5. Industrial Product Price Indexes: Net Outflows by Major Group(1)

TABLEAU 5. Indices des prix des produits industriels: sorties nettes par groupes principaux d'industries(1)

1981 = 100 1981 = 100

	Month – Mois												Annual average – Moyenne annuelle
	Jan. – Janv.	Feb. – Fév.	March – Mars	April – Avril	May – Mai	June – Juin	July – Juill.	Aug. – Août	Sept.	Oct.	Nov.	Déc.	
Indexes of net outflows of total manufacturing – Indices des sorties nettes de l'ensemble des industries manufacturières **D 613800**													
Indexes of net outflows of food and beverage industries – Indices des sorties nettes des industries des aliments et boissons D 613801													
Indexes of net outflows of tobacco products industries – Indices des sorties nettes des industries des produits du tabac D 613802													
Indexes of net outflows of rubber and plastics products industries – Indices des sorties nettes des industries du caoutchouc et des produits en matière plastique D 613803													
Indexes of net outflows of leather industries – Indices des sorties nettes des industries du cuir D 613804													
Indexes of net outflows of textile industries – Indices des sorties nettes des industries textiles D 613805													
Indexes of net outflows of knitting mills – Indices des sorties nettes des bonneteries D 613806	Not available at this time. Non disponible pour le moment.												
Indexes of net outflows of clothing industries – Indices des sorties nettes des industries du vêtement D 613807													
Indexes of net outflows of wood industries – Indices des sorties nettes des industries du bois D 613808													
Indexes of net outflows of furniture and fixture industries – Indices des sorties nettes des industries du meuble et des articles d'ameublement D 613809													
Indexes of net outflows of paper and allied industries – Indices des sorties nettes des industries du papier et activités connexes D 613810													
Indexes of net outflows of printing, publishing and allied industries – Indices des sorties nettes des industries d'imprimerie, édition et activités connexes D 613811													
Indexes of net outflows of primary metal industries – Indices des sorties nettes des industries de la première transformation des métaux D 613812													
Indexes of net outflows of metal fabricating industries (excl. machinery and transportation equipment) – Indices des sorties nettes des industries de la fabr. des prod. en métal (sauf mach. et mat. de transp.) D 613813													

Note: Indexes for the most recent six months shown are subject to revision.
Nota: Les indices figurant pour les six mois les plus récents sont sujets à révision.

Nota: Les indices figurant pour les six mois les plus récents sont sujets à révision.
(1) Net outflow indexes are calculated for the major groups described by the 1970 Standard Industrial Classification. The 1980 SIC is not used because the Input-Output tables are not yet available on the updated classification. — Les indices des sorties nettes sont calculés pour les groupes principaux dérivés de la Classification des activités économiques de 1970. La classification type des industries de 1980 n'est pas utilisée en raison de l'indisponibilité des tableaux des Entrées-Sorties suivant la nouvelle classification.

EXPLANATION OF METHODS USED AND ADDITIONAL SOURCES FOR INDUSTRIAL PRICE INDEXES

Industrial Product Price Indexes, 1981 = 100

The Industrial Product Price Indexes (IPPI) measure price changes for major commodities sold by Canadian manufacturers. Elemental indexes are calculated for 1314 Principal Commodity Group (PCG) outputs as defined in the 1981 Input/Output (I/O) table. Weights used to aggregate commodity indexes are taken from the output or "Make" matrix of the I/O system which provides an integrated set of commodity values for all manufacturing industries.

Directly surveyed commodities are supported by formal sampling procedures and a quality rating is presented for commodities and aggregations of commodities. Such indexes are derived from prices reported most often for the 15th of the month or the nearest prior business day for comparable transactions.

Selected indexes are published about 6 weeks after the reference period in the *Daily Bulletin* (Catalogue 11-001) following a pre-announced schedule of release dates. Simultaneously, all series are available from CANSIM or on request. Catalogue 62-011, *Industry Price Indexes,* is released about three weeks after the Daily Bulletin release. Each series is identified with a CANSIM D number and with a commodity (PCG) or industry (SIC) identifier. Each release of numbers is subject to revision for six months, i.e., when a July index is released, the index for the preceding January becomes final. Exceptions to this rule are announced.

Price Surveys

About 10,000 prices are collected monthly from about 3,000 producers for goods sold which are valued at the boundary of the establishment, wherein the cost of taxes collected at that point and transportation provided by public carriers beyond that point are excluded. Prices are reported for finely specified transactions wherein both the good and terms of sale are identified. Such collections are instituted for important commodities. Expansions are made to the samples where price movement has a regional dimension or where there are important flows of goods to export markets.

Sampling for any directly surveyed elemental index is usually done by a formal probability sampling procedure, wherein important producers are "must take" respondents and a random selection is made of the smaller producers. Such samples are redrawn on a regular cycle as dictated by changes in the market. A given elemental index is usually supported by 12 to 15 price quotes, although some are derived from as few as 8 quotes or as many as 30 quotes.

About 700 of the 1314 PCGs in the manufacturing sector are accommodated by direct surveys and these account for about 85% of the value of manufacturing output in 1981. The price movement for the remaining

EXPLICATION DES MÉTHODES UTILISÉES ET SOURCES SUPPLÉMENTAIRES DES PRIX INDUSTRIELS

Indice des prix des produits industriels, 1981 = 100

Les indices des prix des produits industriels (IPPI) mesurent les variations des prix des principaux produits vendus par les fabricants canadiens. Les indices élémentaires sont calculés pour 1314 groupes principaux des produits (GPP) tels que définis dans les tableaux d'entrées-sorties de 1981. Les poids servant à agréger les indices des produits proviennent de la matrice des sorties ou de "production" des tableaux d'entrées-sorties. Cette matrice présente un ensemble intégré de valeurs pour les produits à l'intérieur de l'ensemble des industries manufacturières.

Les produits faisant directement l'objet d'un sondage sont basés sur des procédures d'échantillonnage formelles, et une cote de qualité est présentée pour les produits et les agrégats de produits. Ces indices sont calculés à partir des prix déclarés le plus souvent pour le 15 du mois, ou le jour ouvrable précédent le plus proche pour des transactions comparables.

Un certain nombre d'indices sont publiés environ six semaines après la fin de la période de référence dans le *Quotidien* (n^{o} 11-001F au catalogue), selon un calendrier de publication préalablement établi. Simultanément, toutes les séries sont disponibles dans CANSIM ou sur demande. La publication n^{o} 62-011 au catalogue, *Indice des prix de l'industrie,* paraît trois semaines environ après le communiqué dans le Quotidien. Chaque série est identifiée par un numéro D de CANSIM et par un identificateur de produits (GPP) ou de branche d'activité (CTI). Les chiffres publiés pour les six derniers mois sont sujets à révision. Ainsi, lorsque l'indice de juillet est publié, l'indice pour le mois de janvier précédent devient final. Les exceptions à cette règle sont signalées.

Enquêtes des prix

Environ 10,000 prix sont recueillis chaque mois auprès d'environ 3,000 producteurs pour des biens vendus qui sont évalués à la limite de l'établissement, de sorte que les taxes prélevées à ce point et le coût du transport fourni par les transporteurs communs au-delà de ce point sont exclus. Les prix sont relevés pour des transactions à un niveau très détaillé, qui permet d'identifier le bien et les conditions de vente. De tels relevés sont institués pour les produits importants. Des élargissements sont apportés aux échantillons pour lesquels le mouvement des prix a une dimension régionale, ou pour lesquels il existe un important marché pour l'exportation.

L'échantillonnage pour tout indice élémentaire faisant directement l'objet d'un sondage se fait habituellement par une méthode d'échantillonnage probabiliste, selon laquelle les producteurs importants sont des répondants "obligatoires", tandis que l'on procède à une sélection aléatoire des producteurs moins importants. Ces échantillons sont reconstruits régulièrement, suivant l'évolution du marché. Un indice élémentaire donné repose habituellement sur 12 à 15 prix, bien que certains peuvent utiliser aussi peu que 8 prix, ou jusqu'à 30 prix.

Environ 700 des 1314 GPP du secteur de la fabrication font l'objet d'enquêtes directes, qui couvrent environ 85% de la valeur de la production manufacturière en 1981. Le mouvement des prix des 600 GPP restants est estimé indirectement à partir

600 PCGs is estimated indirectly from either directly priced PCGs or through borrowing price movement from other price series.

Weight Base

Commodity and industry weights are taken from the "Make" matrix of the 1981 Input/Output table which, in turn, is derived from 1981 values reported for the Census of Manufacturers and edited to conform to the 1980 Standard Industrial Classification. Within-commodity weights can change in December of each year to reflect major changes in establishments of production patterns.

Formula

Chained series of fixed weighted price indexes are calculated by a linking procedure whereby more recent varieties and changes to establishments are introduced systematically as required in December of each year, while weights from the commodity level through higher levels of aggregation are held constant.

The general formula used for the main aggregations describes the price movement of a specified group of commodities where w^i are the values of the output of each commodity:

$$P_{t/o}^{(agg)} = \sum_i \frac{w^i}{\sum w^i} \cdot P_{t/o}^{i}$$

$P_{t/o}^{(agg)}$ denotes the composite price index movement between the base period o and time t for the defined aggregate;

w^i is the transaction value of the element i in the base period;

$P_{t/o}^{i}$ is the price index for element i, meaning its price change from the base period to time t;

$\sum_i$ indicates summation over all elements i in the defined aggregate.

Historical Data

The 1981 = 100 industry aggregation of elemental commodities is directly relatable to the 1971 = 100 Industry Selling Price Indexes which is available from 1956 to 1985. In a note to users provided with the September 1985 issue of Catalogue 62-011 *Industry Price Indexes* the nearest equivalent series for both the 1971 and the 1981 based series were identified and the degree of compatability of the two series was stated. Link factors,

de GPP faisant directement l'objet d'un sondage, ou en empruntant le mouvement des prix d'autres séries de prix.

Sources des poids

Les poids des produits et des branches d'activité proviennent de la matrice "production" du tableau d'entrées-sorties de 1981, laquelle à son tour est établie à partir des valeurs de 1981 déclarées pour le recensement des manufactures, et rectifiées afin d'être conforme à la Classification type des industries de 1980. Les poids internes des produits peuvent changer en décembre de chaque année afin d'appréhender les changements importants dans les schémas de la production.

Formule

Les séries en chaîne des indices de prix à pondération fixe sont calculées par une méthode de raccordement suivant laquelle les plus récentes variétés et les changements au niveau de l'univers des entreprises sont incorporés systématiquement, selon les besoins, en décembre de chaque année. Toutefois, les pondérations du niveau des produits jusqu'aux niveaux successivement plus élevés d'agrégation sont maintenues constantes.

La formule générale servant au calcul des agrégations principales décrit les mouvements de prix d'un groupe donné de produits, dans laquelle w^i sont les valeurs de la production de chaque produit:

$P_{t/o}^{(agg)}$ dénote le mouvement de l'indice composite de prix entre la période de référence o et la période t pour l'agrégat défini;

w^i est la valeur de transaction de l'élément i au cours de la période de référence;

$P_{t/o}^{i}$ est l'indice de prix de l'élément i, désignant sa variation de prix entre la période de référence et la période t;

$\sum_i$ signifie la sommation de tous les éléments i dans l'agrégat défini.

Données historiques

L'agrégation par industries basée 1981 = 100 des produits élémentaires se rattache directement aux indices des prix de vente dans l'industrie 1971 = 100, qui existent pour la période 1956-1985. La note aux utilisateurs parue dans le numéro de septembre 1985 de la publication n^{o} 62-011 au catalogue *Indices des prix de l'industrie* identifiait la série équivalente la plus proche pour les séries basées sur 1971 et 1981, ainsi que le degré de comparabilité. Les facteurs de raccordement, calculés à partir de

derived from the relationship of the two series in December 1985, will also be published in the January issue of Catalogue 62-011. These link factors will not be revised. Users can obtain a continuous series on a 1971 = 100 base by consulting the July 1984 and the December 1985 issues of Catalogue 62-011 or by retrieving the data from CANSIM.

Reference Document

62-556 Industrial Product Price Indexes, 1981 = 100, Concepts and Methods, $25.00.

This publication describes the economic content of the series within the framework of the system of national accounts and describes how this affects price index methodology. Sampling and pricing methods are described as are index calculation and aggregation procedures. The relationship of the new series to its Industry Selling Price predecessor is given. Comments on index use are provided.

In the tables will be found weighting patterns for both aggregations of commodities and commodities into commodity groupings. Descriptions of the characteristics of the elemental indexes are provided. A listing is provided of nearest equivalent series in the 1981 = 100 series as they relate to the 1971 = 100 Industry Selling Price Indexes.

A glossary of terms is also provided.

la relation des deux séries en décembre 1985, paraîtront également dans le numéro de janvier de la publication n^{o} 62-011 au catalogue. Ces facteurs ne seront pas révisés. Les utilisateurs peuvent obtenir une série continue sur la base 1971 = 100 en consultant le numéro de juillet 1984 et celui de décembre 1985 de la publication n^{o} 62-011 au catalogue, ou en extrayant les données de CANSIM.

Document de référence

62-556 Indices des prix des produits industriels, 1981 = 100, Concepts et méthodes, $25.00.

Cette publication précise le contenu économique des séries dans le cadre général du système des comptes nationaux, et son impact sur la méthodologie des indices de prix. Elle contient une description des méthodes d'échantillonnage et d'observation des prix, de même que des méthodes de calcul et d'agrégation des indices. Les relations entre la nouvelle série et l'ancienne série des prix de vente dans l'industrie qui l'avait précédée s'y trouvent également. La publication contient des commentaires sur l'utilisation des indices.

Les tableaux contiennent les schémas de pondération à la fois pour les agrégats de produits et de produits en groupes. Y figurent également une description des caractéristiques des indices élémentaires ainsi qu'une liste des séries équivalentes les plus proches de la série 1981 = 100, dans la mesure où elles se rapportent aux Indices des prix de vente dans l'industrie 1971 = 100.

La publication contient également un glossaire.

RAW MATERIALS PRICE INDEXES (1981 = 100)

The Raw Materials Price Indexes measure price changes for the purchase of raw materials by Canadian industry. The term "raw material" refers either to a commodity that is sold for the first time after being extracted from nature, or a substitutable recycled product (e.g. metal scrap). For example wheat is considered as a raw material, but wheat flour is not, iron ore is but not pig iron, coal but not electricity. Approximately eighty commodities are priced in the index, grouped into seven major components.

The index and the major group indexes, on a 1981 time base, are published monthly in the Daily Bulletin approximately five weeks after the end of the reference month. They are also available at that time on CANSIM in matrix 1980.

These indexes are, to a large extent, a continuation of the previously published Raw Materials Price Indexes, 1977 = 100. The new, 1981 = 100 indexes can be linked with their equivalents in the 1977 = 100 series using the link factors which were released in the January 1986 issue and repeated in the February and March issues of this publication. Apart from the change in time and weight base, there have been some minor changes in the structure and methodology. Thus, the previous major group Textiles has been discontinued and the commodities forming it re-distributed: cotton is now a part of vegetable products and wool is a part of animal and animal products. Man-made fabrics, which did not satisfy the definition of raw materials, have been excluded from the revised index. At the same time, both the commodity samples and the samples of respondents have been revised and updated to give more reliable estimates of price movement. As a consequence some additional commodity detail is now available.

The index covers purchases of domestically produced and imported goods by Canadian industry, generally for further processing, and does not cover exports or flows of raw materials directly to final demand (principally foodstuffs). For example, potatoes bought by food processing manufacturers (for the manufacture of potato chips, or frozen french fries) are included in the index, but those bought by consumers directly are not.

As a purchasers' price index, prices should include all charges purchasers incur to bring a commodity to the establishment gate. Thus transportation charges, taxes and custom duties are all included. So also are the effects of subsidies, if any are paid to the purchaser.

While prices are ideally collected from the purchaser, there are several cases where other well known prices are used instead: for example, marketing board prices for eggs and milk, and stockyard prices for some livestock. In a few cases, where data for unprocessed materials are not available, prices are taken for a similar commodity at

INDICES DES PRIX DES MATIÈRES BRUTES (1981 = 100)

Les Indices des prix des matières brutes mesurent les variations des prix d'achat des matières brutes par les industries canadiennes. L'expression "matière brute" désigne soit un produit vendu pour la première fois après son extraction de la nature, soit un produit substitut recyclé (tel les déchets de métaux). Ainsi, le blé est considéré comme une matière brute, mais non la farine de blé, le minerai de fer mais non la fonte en gueuses, le charbon mais non l'électricité. Les prix d'environ quatre-vingt produits, regroupés en sept composantes principales, sont recueillis aux fins de l'indice.

L'indice d'ensemble et les indices des composantes principales, ayant comme période de référence 1981, sont publiés mensuellement dans le Quotidien de Statistique Canada, environ cinq semaines après la fin du mois de référence. Ces indices sont également disponibles dans la matrice 1980 de CANSIM.

Ces indices constituent, dans une large mesure, la suite des Indices des prix des matières brutes, 1977 = 100, précédemment publiés. Les nouvelles séries basées 1981 = 100 peuvent être raccordées à leurs séries équivalentes basées 1977 = 100 en utilisant les facteurs de raccordement. Ces derniers sont publiés dans le numéro de janvier 1986, et répétés dans les numéros de février et de mars 1986, de la présente publication. Outre le changement dans la période de pondération et de référence, de légères modifications ont été apportées à la structure et à la méthodologie. Ainsi, l'ancienne composante principale nommée Matières textiles a été dissoute, et les produits qui en faisaient partie ont été reclassifiés comme suit: le coton se retrouve maintenant avec les substances végétales, et la laine, avec les animaux et substances animales. Ne satisfaisant pas à la définition de matières brutes, les fibres synthétiques ont été exclues du nouvel indice. Par ailleurs, les échantillons à la fois des produits et des répondants ont été révisés et mis à jour afin d'obtenir des estimations plus fiables des mouvements de prix. En conséquence, plus de détails sont maintenant disponibles pour certains produits.

L'indice couvre les achats par les industries canadiennes de biens produits au Canada et de biens importés, en vue d'une transformation subséquente. L'indice ne couvre cependant pas les exportations, ni les matières brutes qui se rendent directement à la demande finale (principalement les denrées alimentaires). Par exemple, les pommes de terre achetées par les fabricants de produits alimentaires (pour la production de croustilles ou de pommes de terre congelées) sont pris en compte dans l'indice, alors que celles directement achetées par les consommateurs ne le sont pas.

Comme il s'agit d'un indice des prix d'achat, les prix devraient comprendre tous les frais supportés par l'acheteur pour faire parvenir le produit à la porte de l'établissement. Les frais de transport, les taxes et les droits de douane, de même que les effets de toute subvention versée à l'acheteur, sont donc incorporés aux prix.

Bien qu'idéalement, les prix sont directement recueillis auprès des acheteurs, il existe en pratique un certain nombre de cas où des prix d'autres sources bien connues soient utilisés: par exemple, les prix des offices de commercialisation des oeufs et du lait, les prix des parcs à bestiaux. Dans un certain nombre de cas où les données pour les matières non transformées ne sont

the next stage of processing as occured for some non-ferrous metals. A detailed description of the characteristics of prices for any commodity is available from Prices Division on request.

Prices collected each month are those in effect on the 15th of the month or the nearest prior business day. In a few cases, prices used are averages for the week which includes the 15th. Prices are reported directly to Statistics Canada or are taken from trade publications or from publications of other government departments.

Weights were derived from the 1981 Input/Output tables which provide values at purchasers prices of commodities purchased as intermeditate inputs. These weights are shown in the accompanying table.

Indexes for aggregates of individual raw materials are calculated according to the following formula:

$$P_{t/o}^{(agg)} = \sum_i \frac{w^i}{\sum w^i} \cdot P_{t/o}^{i}$$

$P_{t/o}^{(agg)}$ denotes the composite price index movement between the base period o and time t for the defined aggregate;

w^i is the transaction value of the element i in 1981;

$P_{t/o}^{i}$ is the price index for element i, meaning its price change from the base period to time t;

$\sum_i$ indicates summation over all elements i in the defined aggregate.

Within individual commodity indexes, the prices are weighted according to their market share in 1981 or a more recent year. In a few instances where data are not available, the price quotations are equally weighted.

For further details, please contact Prices Division, Statistics Canada, Ottawa, Ontario K1A 0T6 or telephone 613-990-9607.

pas disponibles, les prix sont prélevés pour un produit semblable à l'étape suivante de transformation. Tel est le cas notamment pour certains métaux non ferreux. La Division des prix fera parvenir sur demande une description détaillée des caractéristiques des prix d'un produit donné.

Les prix recueillis chaque mois sont ceux en vigueur le 15 du mois ou le jour ouvrable qui le précède immédiatement. Dans certains cas, les prix relevés représentent la moyenne des prix de la semaine englobant le 15 du mois. Les prix sont soit déclarés directement à Statistique Canada, soit tirés de revues spécialisées ou de publications d'autres organismes gouvernementaux.

Les pondérations furent dérivées des tableaux d'entrées-sorties de 1981, qui fournissent les valeurs aux prix d'achat des produits acquis à titre d'entrées intermédiaires. Ces pondérations sont présentées au tableau ci-joint.

Les indices pour les agrégats de matières brutes individuelles sont dégagés à l'aide de la formule suivante:

$P_{t/o}^{(agg)}$ dénote le mouvement de l'indice composite de prix entre la période de référence o et la période courante t pour l'agrégat spécifié;

w^i est la valeur de transaction de l'élément i en 1981;

$P_{t/o}^{i}$ est l'indice de prix pour l'élément i, c'est-à-dire son changement de prix de la période de référence o à la période courante t;

$\sum_i$ indique la sommation sur tous les éléments i faisant partie de l'agrégat spécifié.

À l'intérieur des indices individuels des produits, les prix sont pondérés selon leurs parts du marché en 1981 ou pour une année plus récente. Dans quelques cas où les données ne sont pas disponibles, les cotes de prix ont des pondérations équivalentes.

Pour plus de renseignements, veuillez contacter la Division des prix, Statistique Canada, Ottawa, Ontario, K1A 0T6, ou téléphonez au 613-990-9607.

RAW MATERIALS PRICE INDEX, 1981 = 100, WEIGHTING DIAGRAM

INDICE DES PRIX DES MATIÈRES BRUTES, 1981 = 100, SCHÉMA DE PONDÉRATION

Index - Indice	Weights - Pondérations	
	Total Ensemble	Major group Groupe majeur
	percentage - pourcentage	
Raw materials - Total - Ensemble des matières brutes	100.0	
Total excluding mineral fuels - Ensemble sauf combustibles minéraux	54.74	
Vegetable products – Substances végétales	**10.40**	**100.0**
Fresh fruits - Fruits frais	0.49	4.79
Grains - Céréales	3.47	33.39
Oilseeds - Oléagineux	1.56	15.01
Fresh vegetables - Légumes frais	1.07	10.37
Tobacco, raw - Tabac, en feuilles	0.76	7.35
Sugar, unrefined - Sucre, non raffiné	1.23	11.85
Natural rubber & allied gums - Caoutchouc et gommes analogues, naturels	0.28	2.70
Cocoa, coffee & tea - Cacao, café et thé	1.02	9.83
Hay & forage - Foin et fourage	0.03	0.37
Vegetable textile fibres - Fibres textiles d'origine végétale	0.44	4.28
Animal & animal products – Animaux et substances animales	**20.44**	**100.0**
Furs, hides & skins - Fourrures, cuirs & peaux	0.80	3.93
Cattle and calves - Bovins & veaux	6.68	32.69
Sheep & lambs - Moutons et agneaux	0.03	0.19
Hogs - Swine, nes. - Porcs destinés à l'abbatage	3.59	17.57
Poultry - Volaille	1.65	8.10
Milk, whole, unprocessed - Lait, entier, non transformé	5.69	27.83
Eggs in the shell - Oeufs en coquille	0.22	1.11
Fish - Poisson	1.63	8.01
Animal textile fibres - Fibres textiles d'origine animale	0.10	0.53
Wood – Bois	**8.07**	**100.0**
Logs and bolts - Billes et billots	4.93	61.06
Pulpwood - Bois à pâte	3.14	38.93
Ferrous materials – Matières ferreuses	**2.30**	**100.0**
Iron ore - Minerais de fer	1.53	66.17
Iron & steel scrap - Déchets de fer et d'acier	0.78	33.83
Non ferrous metals – Métaux non ferreux	**11.13**	**100.0**
Copper concentrates - Concentrés de cuivre	2.83	25.43
Lead concentrates - Concentrés de plomb	0.91	8.25
Nickel concentrates - Concentrés de nickel	0.42	3.85
Zinc concentrates - Concentrés de zinc	0.63	5.74
Radio-actives concentrates - Concentrés radio-actifs	1.18	10.68
Precious metals - Métaux précieux	1.92	17.27
Other base metals - Autres métaux non ferreux	2.65	23.83
Non-ferrous scrap - Déchets de métaux non ferreux	0.54	4.91
Non-metallic minerals – Minéraux non métalliques	**2.38**	**100.0**
Sulphur - Soufre	0.16	6.78
Asbestos fibres - Fibres d'amiante	0.03	1.45
Clays and other crude refractory - Argile & autres matières réfractaires brutes	0.21	8.82
Sand and gravel - Sable et gravier	0.41	17.36
Stone - Pierre	0.68	28.70
Other crude minerals - Autres minéraux bruts	0.87	36.85
Mineral fuels – Combustibles minéraux	**45.25**	**100.0**
Coal (thermal) - Charbon (thermique)	3.48	7.70
Crude mineral oil - Huiles minérales brutes	38.38	84.80
Natural gas - Gaz naturel	3.39	7.49

ELECTRIC POWER SELLING PRICE INDEXES (NON-RESIDENTIAL), 1981 = 100

Electric Power Selling Price Indexes are published on a regional and provincial basis for two broad industrial customer categories of sales for bills less than 5000 kW and for sales of 5000 kW or more. Prices are reported by electric utilities for non-interruptible power contracts with manufacturing, service, and other Canadian industrial customers. Monthly prices are collected from all major generating and distributing utilities three times a year. The resulting indexes are released with other monthly Industry Price Indexes for April, August and December of each year. The indexes have 1981 as a time reference base and the weights used are 1981 company revenues from sales of electricty, as collected by Prices Division.

The formula used to calculate the Electric Power Selling Price Indexes is a fixed weighted index formulation, which is the same as that described in the Industry Product Price Indexes, 1981 = 100, technical notes presented above. The indexes are available on CANSIM in matrix 1979. Indexes for the current year and the previous year are subject to revision.

INDICES DES PRIX DE VENTE DE L'ÉNERGIE ÉLECTRIQUE (NON RÉSIDENTIELLE), 1981 = 100

Les indices des prix de vente de l'énergie électrique sont publiés, par région et par province, pour deux grandes catégories de clients industriels, soit les factures de moins de 5000 kW et les factures de 5000 kW et plus. Les prix sont déclarés par les services publics d'électricité pour des contrats d'énergie non susceptible d'être interrompue, conclus avec des manufacturiers, des services et d'autres clients industriels canadiens. Les prix mensuels sont relevés trois fois par année auprès de tous les grands services de production et de distribution d'énergie. Les indices établis, accompagnés d'autres indices mensuels des prix de l'industrie, sont diffusés chaque année aux mois d'avril, d'août et de décembre. Les indices ont comme période de référence 1981, et les pondérations sont fondées sur les recettes au titre des ventes qu'ont touchées les entreprises en 1981, telles que recueillies par la Division des prix.

Le calcul des indices des prix de vente de l'énergie électrique se fait à l'aide d'une formule d'indice à pondération fixe, identique à celle décrite ci-dessus dans les notes techniques des Indices des prix des produits industriels, 1981 = 100. Les indices sont disponibles par l'entremise de CANSIM sur la matrice 1979. Les indices de la présente année et de l'année précédente sont sujets à révision.

Data in Many Forms ...

Statistics Canada disseminates data in a variety of forms. In addition to publications, both standard and special tabulations are offered on computer print-outs, microfiche and microfilm, and magnetic tapes. Maps and other geographic reference materials are available for some types of data. Direct access to aggregated information is possible through CANSIM, Statistics Canada's machine-readable data base and retrieval system.

How to Obtain More Information

Inquiries about this publication and related statistics or services should be directed to:

Goods and Services Producing Industries Section,
Prices Division,

Statistics Canada, Ottawa, K1A 0T6 (Telephone: 951-9607) or to the Statistics Canada reference centre in:

St. John's	(772-4073)	Winnipeg	(983-4020)
Halifax	(426-5331)	Regina	(780-5405)
Montréal	(283-5725)	Edmonton	(420-3027)
Ottawa	(951-8116)	Calgary	(292-6717)
Toronto	(973-6586)	Vancouver	(666-3691)
Sturgeon Falls	(753-4888)		

Toll-free access is provided in all provinces and territories, **for users who reside outside the local dialing area** of any of the regional reference centres.

Des données sous plusieurs formes ...

Statistique Canada diffuse les données sous formes diverses. Outre les publications, des totalisations habituelles et spéciales sont offertes sur imprimés d'ordinateur, sur microfiches et microfilms et sur bandes magnétiques. Des cartes et d'autres documents de référence géographiques sont disponibles pour certaines sortes de données. L'accès direct à des données agrégées est possible par le truchement de CANSIM, la base de données ordinolingue et le système d'extraction de Statistique Canada.

Comment obtenir d'autres renseignements

Toutes demandes de renseignements au sujet de cette publication ou de statistiques et services connexes doivent être adressées à:

Setion des industries de biens et de services,
Division des prix,

Statistique Canada, Ottawa, K1A 0T6 (téléphone: 951-9607) ou au centre de consultation de Statistique Canada à:

St. John's	(772-4073)	Winnipeg	(983-4020)
Halifax	(426-5331)	Regina	(780-5405)

Highlights

Industrial Product Price Index (IPPI)

According to preliminary figures, the Industrial Product Price Index (IPPI, 1981 = 100) rose by 0.6% in August 1987. Close to half of this increase was attributable to the price increases for petroleum and coal products. A sixth straight monthly advance in primary metal products, an increase in softwood lumber, particularly in British Columbia, as well as a slight rise in export pulp and newsprint paper prices, also contributed to the monthly advance of the overall index.

The year-over-year movement, from August 1986 to August 1987, was 3.9%, the highest since the end of 1984. Excluding the petrolem and coal products component, the yearly rate of change would have been 3.4%. Also, for the first time since December 1985, the year-over-year advance of the IPPI was higher than the level excluding petroleum and coal products.

Mainly as a result of increases for motor gasoline, fuel and asphalt, preliminary estimates indicate that petroleum and coal products rose by 2.5% in August 1987. After a trough of -30.4% in December 1986, the year-over-year movement of this index is now 8.6%.

Primary metal products rose by 1.4% in August 1987 for a sixth straight monthly increase. All of the major components of this index, with the exception of iron and steel products, registered changes higher than 18% over the last six months. However, primary metal products recorded an increase of only 6.9% over August 1986. In August 1987, aluminum products (2.2%), copper products (4.8%) and nickel products (4.2%), as well as refined gold bullion (1.8%) rose, while silver dropped 3.1%. Pushed up by base metals, ferrous and non-ferrous scrap metals rose 9.3% in August 1987, exceeding the August 1986 level by 36.0%.

Lumber and sawmill products rose by 1.3% in August 1987, up 2.7% from August 1986. The 2.1% increase for softwood lumber and, to a lesser extent, the 4.1% increase for softwood plywood and veneer were mainly responsible for the monthly advance of the group index. Prices for softwood lumber rose, particularly in British Columbia (2.3%), as hemlock increased by 6.2% and western red cedar, by 2.4%.

Paper and paper products advanced by 0.6% in August 1987, an increase of 10.1% over August 1986. This monthly advance was mainly attributable to price increases for exports of bleached sulphite pulp (1.3%) and newsprint paper (1.3%). It is noteworthy that the drop in the Canadian dollar relative to its American counterpart exercised a significant positive impact on these price indexes, by increasing the value in Canadian dollars of export prices quoted in U.S. dollars.

Faits saillants

Indice des prix des produits industriels (IPPI)

D'après les chiffres préliminaires, l'indice des prix des produits industriels (IPPI, 1981 = 100) s'est accru de 0.6% au mois d'août 1987. Cette hausse mensuelle fut attribuable pour près de la moitié à l'augmentation des prix des produits du pétrole et du charbon. Le sixième accroissement mensuel consécutif dans le secteur des produits métalliques primaires, la hausse des prix du bois résineux de construction, principalement en Colombie-Britannique, de même que la légère augmentation des prix des pâtes de bois et du papier journal sur les marchés d'exportation ont également contribué au mouvement mensuel de l'indice d'ensemble.

La progression annuelle de l'IPPI, de août 1986 à août 1987, a atteint 3.9%, soit le niveau le plus élevé enregistré depuis la fin de 1984. En excluant la composante des produits du pétrole et du charbon, le taux de variation annuel de l'IPPI se serait établi à 3.4%. Aussi, pour la première fois depuis décembre 1985, la progression annuelle de l'IPPI fut supérieure à celle excluant les produits du pétrole et du charbon.

En raison surtout des hausses de prix pour l'essence à moteur, les carburants et l'asphalte, l'indice des prix des produits du pétrole et du charbon a augmenté, selon les premières estimations, de 2.5% au mois d'août 1987. Après avoir enregistré un creux de -30.4% au mois de décembre 1986, la variation sur douze mois de cet indice atteint maintenant 8.6%.

L'indice des prix des produits métalliques primaires s'est accru de 1.4% au mois d'août 1987 pour enregistrer une sixième hausse mensuelle consécutive. L'ensemble des composantes principales de cet indice, à l'exception des produits du fer et de l'acier, ont affiché des taux de variation supérieurs à 18% pour les six derniers mois. Toutefois, l'indice des prix des produits métalliques primaires s'inscrivait en hausse de 6.9% seulement par rapport à août 1986. En août 1987, les produits de l'aluminium (2.2%), du cuivre (4.8%) et du nickel (4.2%) de même que les profilés d'affinage d'or et d'alliages d'or (1.8%) enregistraient tous des hausses, tandis que l'argent diminuait de 3.1%. Sous la poussée des prix des métaux de base, l'indice des prix des métaux ferreux et non-ferreux s'accroissait de 9.3% en août 1987, pour dépasser de 36.0% son niveau d'août 1986.

L'indice des prix des sciages et produits de scierie a augmenté de 1.3% au mois d'août 1987, en hausse de 2.7% par rapport à août 1986. Les accroissements de 2.1% pour le bois de construction de résineux et, dans une moindre mesure, de 4.1% pour les placages et les contre-plaqués de bois résineux furent les principaux responsables de la hausse mensuelle de l'indice du groupe. Les prix pour le bois de construction de résineux ont surtout progressé en Colombie-Britannique (2.3%), avec des hausses de 6.2% pour la pruche et de 2.4% pour le thuya géant.

L'indice des prix du papier et produits connexes s'est accru de 0.6% au mois d'août 1987, en hausse de 10.1% par rapport à août 1986. L'accroissement mensuel a découlé en majeure partie des hausses de prix sur les marchés d'exportation pour la pâte de bois au sulfite blanchie (1.3%) et le papier journal (1.3%). À noter que la baisse du dollar canadien par rapport à la devise américaine, en augmentant la valeur en dollars canadiens des produits exportés cotés en dollars américains, a exercé un impact positif significatif sur ces indices.

Highlights

Raw Materials Price Index

Preliminary estimates show the Raw Materials Price Index (RMPI, 1981 = 100) increased 1.3% between July and August to a level of 106.7. This monthly increase was mainly the result of an estimated 2.0% increase for the mineral fuels component, a 2.4% rise in non- ferrous metals prices and a 0.7% increase in prices for animals and animal products. Over the year, the RMPI increased 17.4%. Excluding the mineral fuels component, the RMPI increased 0.9% over the month and 6.2% over the year. Of the seven components making up the Raw Materials Price Index, six registered increases over the month while one showed a decrease.

The mineral fuels component index was estimated to have increased 2.0% in August to a level of 101.1. This was 36.6% higher than its level a year ago. Higher crude oil prices continued to be the dominant factor within the component. They were estimated to have increased 2.3% in August to stand 49.2% higher than in August 1986.

The index for non-ferrous metals increased 2.4% over the month to a level 19.0% higher than a year earlier. At a level of 106.0, this index was at its highest level since January 1981. This component of the RMPI first dipped below 100.0 in June 1981 and had remained below that level until June 1987. In August 1987, copper registered an increase of 4.8%, its sixth consecutive monthly increase. Over the last six months it has risen 25.4%. Nickel also posted a significant rise in August, up 7.0% over the month and 15.2% over the year. Price increases for gold and platinum resulted in a 2.0% increase for the precious metals index. While lead increased only 0.2% in August, it was 78.3% higher than its year-earlier level.

The animals and animal products component index was up 0.7% in August to a level of 123.0. A 3.3% jump in hog prices was the prime factor in the component index increase. Despite the increase in August, hog prices remain 5.5% below their August 1986 level. Also contributing to the monthly increase was a 2.5% rise in fish prices. Over the year, fish prices have increased 10.7%. In August, prices for cattle and calves decreased 0.4%. However, they remained 9.2% higher than a year ago.

The only component to register a decrease over the month was vegetable products. It declined 0.4% to a level of 84.2. Grain prices continued to be weak, declining 0.5% in August. Barley, buckwheat and corn were all lower over the month. The index for grains remained 3.5% below its year-earlier level. Oilseeds dropped 3.0% over the month as prices for soybeans, rapeseed and flaxseed all decreased. Over the year, oilseeds have declined 3.3%. Unrefined sugar decreased 2.8% over the month to a level of 48.0.

Faits saillants

Indice des prix des matières brutes

D'après les premières estimations, l'indice des prix des matières brutes (IPMB, 1981 = 100) a augmenté de 1.3% entre juillet et août pour atteindre le niveau de 106.7. Cette hausse mensuelle fut essentiellement attribuable à une progression de l'ordre de 2.0% de la composante des combustibles minéraux, de 2.4% des prix des métaux non ferreux et de 0.7% des prix des animaux et substances animales. En un an, l'IPMB a affiche un gain de 17.4%. Sans compter les combustibles minéraux, l'IPMB s'est accru de 0.9% au cours du mois et de 6.2% au cours de l'année. Des sept composantes de l'indice des prix des matières brutes, six ont enregistré une hausse au cours du mois et une a accusé une baisse.

D'après les premières estimations, l'indice de la composante des combustibles minéraux a augmenté de 2.0% en août pour atteindre 101.1, ce qui représente une hausse de 36.6% par rapport à son niveau d'il y a un an. Cette progression fut encore essentiellement attribuable à la remontée des prix des huiles minérales brutes. D'après les chiffres préliminaires, ceux-ci ont augmenté de 2.3% en août, pour s'établir en hausse de 49.2% par rapport à août 1986.

L'indice des métaux non ferreux s'est accru de 2.4% au cours du mois pour dépasser de 19.0% son niveau d'il y a un an. À 106.0, cet indice était à son niveau le plus élevé depuis janvier 1981. Cette composante de l'IPMB est d'abord tombée en deçà de 100.0 en juin 1981 et s'est maintenue au-dessous de ce niveau jusqu'en juin 1987. En août 1987, le cuivre a enregistré un gain de 4.8%, sa sixième augmentation mensuelle consécutive. Au cours des six derniers mois, il s'est élevé de 25.4%. Le nickel a aussi affiché une forte majoration en août, en hausse de 7.0% au cours du mois et de 15.2% au cours de l'année. Le relèvement du prix de l'or et du platine a entraîné une hausse de 2.0% de l'indice des métaux précieux. Le plomb n'a augmenté que de 0.2% en août, mais cette progression a représenté un accroissement de 78.3% par rapport au niveau d'il y a un an.

L'indice de la composante des animaux et des substances animales a affiché un gain de 0.7% en août pour atteindre 123.0. L'augmentation de l'indice de cette composante fut essentiellement attribuable au bond de 3.3% du prix des porcs destinés à l'abattage. Malgré le relèvement observé au mois d'août, le prix des porcs destinés à l'abattage est de 5.5% inférieur au prix enregistré en août 1986. La progression mensuelle était également due à la montée de 2.5% du prix du poisson. En un an, celui-ci a augmenté de 10.7%. En août, le prix des bovins et des veaux a baissé de 0.4%, mais il dépassait de 9.2% le niveau enregistré un an plus tôt.

La seule composante à afficher un recul au cours du mois fut celle des substances végétales. Elle a fléchi de 0.4% pour atteindre le niveau de 84.2. Les prix des céréales a continué à reculer, baissant de 0.5% en août. L'orge, le sarrasin et le maïs ont tous enregistré des diminutions au cours du mois. L'indice des céréales était de 3.5% inférieur à son niveau d'il y a un an. Les prix des oléagineux ont reculé de 3.0% au cours du mois, ceux du soja, du colza et du lin ont tous baissé. En un an, les oléagineux ont accusé un recul de 3.3%. L'indice du sucre non raffiné s'est replié de 2.8% au cours du mois pour s'établir à 48.0.

(1) Revised
(1) Revise
(2) The aggregation of indexes by commodities or by industries should produce the same grand total. When these totals occasionally differ due to rounding, the All Commodities Index shall be regarded as authoritative, and the All Manufacturing Industries is adjusted to match.
(2) L'agrégation des indices par produits ou par industries devraient résulter en un même grand total. Lorsque ces totaux diffèrent occasionnellement en raison de l'arrondissement, l'indice total - tous les produits devra être considéré comme celui qui fait autorité, et l'indice total - toutes les industries manufacturières sera posé égal.

TABLE 2. Industrial Product Price Indexes, by Commodity and Commodity Aggregations

TABLEAU 2. Indices des prix des produits industriels, par produits et agrégations des produits

1981 = 100

Nota: Les indices figurant pour les six mois les plus récents sont sujets à révision.

(1) The bottom line in each series title block may contain, in order from left to right, the following: the CANSIM Databank code number (d nnnnnn), a numeric descriptor, a coverage measure, and a variability measure. The numeric descriptor is of the order ss-mm-nn-pppp-rr where
ss indicates the S-level commodity code (from 9 to 28)
mm indicates the M-level commodity code (from 14 to 43, 45 to 69)
nn indicates either a split of the M-level commodity,
or 91, which indicates a special aggregation
or 99, which indicates special details.
pppp indicates the PCG code (except for some special aggregations which include several PCGs).
rr indicates a split of a PCG.
The coverage measure for an elemental index is a symbol: E indicates a fully designed sample, S indicates an abbreviated sample, P indicates an indirect estimate. For a composite index the percentage of the coverage which is estimated from direct surveys (E + S) is given; occasionally these coverage measures are rounded to the nearest 5% to preserve confidentiality. The variability measure is given for some indexes to indicate the relative stability of the index estimate due to sampling. The most stable indexes are marked A, the least stable, D. For further information order Industrial Product Price Indexes 1981 = 100, Concepts and Methods (Catalogue No. 62-556).

(1) En lisant de gauche à droite, la ligne en-dessous de chaque titre des séries présente, en tout ou en partie, l'information suivante: le numéro de code "Databank" de CANSIM (D nnnnnn), un numéro d'identification numérique, une mesure du degré de couverture et une mesure de la variabilité.
Le numéro d'identification numérique prend la forme générale ss-mm-nn-pppp-rr où:
ss indique le code du niveau S des produits (de 9 à 28)
mm indique le code du niveau M des produits (de 14 à 43, 45 à 69)
nn indique soit une composante du niveau M des produits, ou prend la valeur de 91 pour les agrégats spéciaux, ou de 99 pour les indices particuliers.
pppp indique le code GPP (sauf pour certains agrégats spéciaux qui comprennent plusieurs GPP)
rr indique une composante d'un GPP.
La mesure du degré de couverture pour les indices élémentaires est présentée à l'aide d'un symbole: E indique un échantillonnage exhaustif, S indique un échantillonage sommaire et P indique une estimation indirecte. Pour les indices composites, la donnée en pourcentage représente une estimation du degré de couverture par échantillonnage direct (E + S). Ces mesures du degré de couverture sont parfois arrondies au 5% le plus près afin d'assurer la confidentialité. La mesure de la variabilité, donnée pour un certain nombre d'indices, indique la stabilité relative de l'indice en tant qu'estimation basée sur un échantillon. Les indices les plus stables sont cotés A, les moins stables, D. Pour plus de renseignements, commandez le document de référence: Indices des prix des produits industriels 1981 = 100, concepts et méthodes (n° 62-556 au catalogue).

Note: Indexes for the most recent six months shown are subject to revision.
Nota: Les indices figurant pour les six mois les plus récents sont sujets à révision.

(1) The aggregation of indexes by commodities or by industries should produce the same grand total. When these totals occasionally differ due to rounding, the All Commodities Index shall be regarded as authoritative, and the All Manufacturing Industries is adjusted to match.

(1) L'agrégation des indices par produits ou par industries devraient résulter en un même grand total. Lorsque ces totaux diffèrent occasionnellement en raison de l'arrondissement, l'indice total - tous les produits devra être considéré comme celui qui fait autorité, et l'indice total - toutes les industries manufacturières sera posé égal.

(2) The numeric code to the right of the CANSIM databank number on the last line of each series is the 1980 Standard Industrial Classification (SIC) code. An explanation of the percentage figures (coverage measure) shown to the right of the SIC can be found at the end of Table 2. These coverage measures are rounded to the nearest 5%, to preserve confidentiality.

(2) Le code numérique a la droite du numéro Databank de CANSIM apparaissant à la ligne du bas de chaque série est le code de la Classification type des industries (CTI) de 1980. Une explication des données en pourcentage (mesure de degré de couverture) apparaissant à la droite du code CTI est disponible à la fin du tableau 2. Ces mesures de degré de couverture sont arrondies au 5% le plus près afin de préserver la confidentialité.

TABLE 5. Industrial Product Price Indexes: Net Outflows by Major Group(1)

TABLEAU 5. Indices des prix des produits industriels: sorties nettes par groupes principaux d'industries(1)

1981 = 100 1981 = 100

	Month Mois												Annual average
	Jan. – Janv.	Feb. – Fév.	March – Mars	April – Avril	May – Mai	June – Juin	July – Juill.	Aug. – Août	Sept.	Oct.	Nov.	Déc.	Moyenne annuelle
Indexes of net outflows of total manufacturing – Indices des sorties nettes de l'ensemble des industries manufacturières **D 613800**													
Indexes of net outflows of food and beverage industries – Indices des sorties nettes des industries des aliments et boissons D 613801													
Indexes of net outflows of tobacco products industries – Indices des sorties nettes des industries des produits du tabac D 613802													
Indexes of net outflows of rubber and plastics products industries – Indices des sorties nettes des industries du caoutchouc et des produits en matière plastique D 613803													
Indexes of net outflows of leather industries – Indices des sorties nettes des industries du cuir D 613804													
Indexes of net outflows of textile industries – Indices des sorties nettes des industries textiles D 613805													
Indexes of net outflows of knitting mills – Indices des sorties nettes des bonneteries D 613806													
Indexes of net outflows of clothing industries – Indices des sorties nettes des industries du vêtement D 613807													
Indexes of net outflows of wood industries – Indices des sorties nettes des industries du bois D 613808													
Indexes of net outflows of furniture and fixture industries – Indices des sorties nettes des industries du meuble et des articles d'ameublement D 613809													
Indexes of net outflows of paper and allied industries – Indices des sorties nettes des industries du papier et activités connexes D 613810													
Indexes of net outflows of printing, publishing and allied industries – Indices des sorties nettes des industries d'imprimerie, édition et activités connexes D 613811													
Indexes of net outflows of primary metal industries – Indices des sorties nettes des industries de la première transformation des métaux D 613812													
Indexes of net outflows of metal fabricating industries (excl. machinery and transportation equipment) – Indices des sorties nettes des industries de la fabr. des prod. en métal (sauf mach. et mat. de transp.) D 613813

	Jan. – Janv.	Feb. – Fév.	March – Mars	April – Avril	May – Mai	June – Juin	July – Juill.	Aug. – Août	Sept.	Oct.	Nov.	Déc.	Moyenne annuelle
Indexes of net outflows of machinery industries (except electrical) – Indices des sorties nettes des industries de la fabrication de machines (sauf électriques) D 613814													
Indexes of net outflows of transportation equipment industries – Indices des sorties nettes des industries de la fabrication de matériel de transport D 613815													
Indexes of net outflows of electrical products industries – Indices des sorteis nettes des industries de la fabrication de produits électriques D 613816													
Indexes of net outflows of non-metallic mineral products industries – Indices des sorties nettes des industries de la fabrication de produits minéraux non métalliques D 613817	Not available at this time. Non disponible pour le moment.												
Indexes of net outflows of petroleum and coal products industries – Indices des sorties nettes des industries de la fabrication de produits du pétrole et du charbon D 613818													
Indexes of net outflows of chemical and chemical products industries Indices des sorties nettes des industries chimiques D 613819													
Indexes of net outflows of miscellaneous manufacturing industries – Indices des sorties nettes des industries manufacturières diverses D 613820													

Note: Indexes for the most recent six months shown are subject to revision.
Nota: Les indices figurant pour les six mois les plus récents sont sujets à révision.

(1) Net outflow indexes are calculated for the major groups described by the 1970 Standard Industrial Classification. The 1980 SIC is not used because the Input-Output tables are not yet available on the updated classification. — Les indices des sorties nettes sont calculés pour les groupes principaux dérivés de la Classification des activités économiques de 1970. La classification type des industries de 1980 n'est pas utilisée en raison de l'indisponibilité des tableaux des Entrées-Sorties suivant la nouvelle classification.

(1) Monthly prices are collected and processed three times per annum.
(1) Des prix mensuels sont relevés et calculés trois fois par année.
(2) Indexes for the current year and previous year are subject to revision.
(2) Les indices pour l'année courante et pour l'année précédente sont sujets à révision.

EXPLANATION OF METHODS USED AND ADDITIONAL SOURCES FOR INDUSTRIAL PRICE INDEXES

Industrial Product Price Indexes, 1981 = 100

The Industrial Product Price Indexes (IPPI) measure price changes for major commodities sold by Canadian manufacturers. Elemental indexes are calculated for 1314 Principal Commodity Group (PCG) outputs as defined in the 1981 Input/Output (I/O) table. Weights used to aggregate commodity indexes are taken from the output or "Make" matrix of the I/O system which provides an integrated set of commodity values for all manufacturing industries.

Directly surveyed commodities are supported by formal sampling procedures and a quality rating is presented for commodities and aggregations of commodities. Such indexes are derived from prices reported most often for the 15th of the month or the nearest prior business day for comparable transactions.

Selected indexes are published about 6 weeks after the reference period in the *Daily Bulletin* (Catalogue 11-001) following a pre-announced schedule of release dates. Simultaneously, all series are available from CANSIM or on request. Catalogue 62-011, *Industry Price Indexes,* is released about three weeks after the Daily Bulletin release. Each series is identified with a CANSIM D number and with a commodity (PCG) or industry (SIC) identifier. Each release of numbers is subject to revision for six months, i.e., when a July index is released, the index for the preceding January becomes final. Exceptions to this rule are announced.

Price Surveys

About 10,000 prices are collected monthly from about 3,000 producers for goods sold which are valued at the boundary of the establishment, wherein the cost of taxes collected at that point and transportation provided by public carriers beyond that point are excluded. Prices are reported for finely specified transactions wherein both the good and terms of sale are identified. Such collections are instituted for important commodities. Expansions are made to the samples where price movement has a regional dimension or where there are important flows of goods to export markets.

Sampling for any directly surveyed elemental index is usually done by a formal probability sampling procedure, wherein important producers are "must take" respondents and a random selection is made of the smaller producers. Such samples are redrawn on a regular cycle as dictated by changes in the market. A given elemental index is usually supported by 12 to 15 price quotes, although some are derived from as few as 8 quotes or as many as 30 quotes.

About 700 of the 1314 PCGs in the manufacturing sector are accommodated by direct surveys and these account for about 85% of the value of manufacturing output in 1981. The price movement for the remaining

EXPLICATION DES MÉTHODES UTILISÉES ET SOURCES SUPPLÉMENTAIRES DES PRIX INDUSTRIELS

Indice des prix des produits industriels, 1981 = 100

Les indices des prix des produits industriels (IPPI) mesurent les variations des prix des principaux produits vendus par les fabricants canadiens. Les indices élémentaires sont calculés pour 1314 groupes principaux des produits (GPP) tels que définis dans les tableaux d'entrées-sorties de 1981. Les poids servant à agréger les indices des produits proviennent de la matrice des sorties ou de "production" des tableaux d'entrées-sorties. Cette matrice présente un ensemble intégré de valeurs pour les produits à l'intérieur de l'ensemble des industries manufacturières.

Les produits faisant directement l'objet d'un sondage sont basés sur des procédures d'échantillonnage formelles, et une cote de qualité est présentée pour les produits et les agrégats de produits. Ces indices sont calculés à partir des prix déclarés le plus souvent pour le 15 du mois, ou le jour ouvrable précédent le plus proche pour des transactions comparables.

Un certain nombre d'indices sont publiés environ six semaines après la fin de la période de référence dans le *Quotidien* (n^{o} 11-001F au catalogue), selon un calendrier de publication préalablement établi. Simultanément, toutes les séries sont disponibles dans CANSIM ou sur demande. La publication n^{o} 62-011 au catalogue, *Indice des prix de l'industrie,* paraît trois semaines environ après le communiqué dans le Quotidien. Chaque série est identifiée par un numéro D de CANSIM et par un identificateur de produits (GPP) ou de branche d'activité (CTI). Les chiffres publiés pour les six derniers mois sont sujets à révision. Ainsi, lorsque l'indice de juillet est publié, l'indice pour le mois de janvier précédent devient final. Les exceptions à cette règle sont signalées.

Enquêtes des prix

Environ 10,000 prix sont recueillis chaque mois auprès d'environ 3,000 producteurs pour des biens vendus qui sont évalués à la limite de l'établissement, de sorte que les taxes prélevées à ce point et le coût du transport fourni par les transporteurs communs au-delà de ce point sont exclus. Les prix sont relevés pour des transactions à un niveau très détaillé, qui permet d'identifier le bien et les conditions de vente. De tels relevés sont institués pour les produits importants. Des élargissements sont apportés aux échantillons pour lesquels le mouvement des prix a une dimension régionale, ou pour lesquels il existe un important marché pour l'exportation.

L'échantillonnage pour tout indice élémentaire faisant directement l'objet d'un sondage se fait habituellement par une méthode d'échantillonnage probabiliste, selon laquelle les producteurs importants sont des répondants "obligatoires", tandis que l'on procède à une sélection aléatoire des producteurs moins importants. Ces échantillons sont reconstruits régulièrement, suivant l'évolution du marché. Un indice élémentaire donné repose habituellement sur 12 à 15 prix, bien que certains peuvent utiliser aussi peu que 8 prix, ou jusqu'à 30 prix.

Environ 700 des 1314 GPP du secteur de la fabrication font l'objet d'enquêtes directes, qui couvrent environ 85% de la valeur de la production manufacturière en 1981. Le mouvement des prix des 600 GPP restants est estimé indirectement à partir

600 PCGs is estimated indirectly from either directly priced PCGs or through borrowing price movement from other price series.

Weight Base

Commodity and industry weights are taken from the "Make" matrix of the 1981 Input/Output table which, in turn, is derived from 1981 values reported for the Census of Manufacturers and edited to conform to the 1980 Standard Industrial Classification. Within-commodity weights can change in December of each year to reflect major changes in establishments of production patterns.

Formula

Chained series of fixed weighted price indexes are calculated by a linking procedure whereby more recent varieties and changes to establishments are introduced systematically as required in December of each year, while weights from the commodity level through higher levels of aggregation are held constant.

The general formula used for the main aggregations describes the price movement of a specified group of commodities where w^i are the values of the output of each commodity:

$$P_{t/o}^{(agg)} = \sum_i \frac{w^i}{\sum w^i} \cdot P_{t/o}^{i}$$

$P_{t/o}^{(agg)}$ denotes the composite price index movement between the base period o and time t for the defined aggregate;

w^i is the transaction value of the element i in the base period;

$P_{t/o}^{i}$ is the price index for element i, meaning its price change from the base period to time t;

$\sum_i$ indicates summation over all elements i in the defined aggregate.

Historical Data

The 1981 = 100 industry aggregation of elemental commodities is directly relatable to the 1971 = 100 Industry Selling Price Indexes which is available from 1956 to 1985. In a note to users provided with the September 1985 issue of Catalogue 62-011 *Industry Price Indexes* the nearest equivalent series for both the 1971 and the 1981 based series were identified and the degree of compatability of the two series was stated. Link factors,

de GPP faisant directement l'objet d'un sondage, ou en empruntant le mouvement des prix d'autres séries de prix.

Sources des poids

Les poids des produits et des branches d'activité proviennent de la matrice "production" du tableau d'entrées-sorties de 1981, laquelle à son tour est établie à partir des valeurs de 1981 déclarées pour le recensement des manufactures, et rectifiées afin d'être conforme à la Classification type des industries de 1980. Les poids internes des produits peuvent changer en décembre de chaque année afin d'appréhender les changements importants dans les schémas de la production.

Formule

Les séries en chaîne des indices de prix à pondération fixe sont calculées par une méthode de raccordement suivant laquelle les plus récentes variétés et les changements au niveau de l'univers des entreprises sont incorporés systématiquement, selon les besoins, en décembre de chaque année. Toutefois, les pondérations du niveau des produits jusqu'aux niveaux successivement plus élevés d'agrégation sont maintenues constantes.

La formule générale servant au calcul des agrégations principales décrit les mouvements de prix d'un groupe donné de produits, dans laquelle w^i sont les valeurs de la production de chaque produit:

$P_{t/o}^{(agg)}$ dénote le mouvement de l'indice composite de prix entre la période de référence o et la période t pour l'agrégat défini;

w^i est la valeur de transaction de l'élément i au cours de la période de référence;

$P_{t/o}^{i}$ est l'indice de prix de l'élément i, désignant sa variation de prix entre la période de référence et la période t;

$\sum_i$ signifie la sommation de tous les éléments i dans l'agrégat défini.

Données historiques

L'agrégation par industries basée 1981 = 100 des produits élémentaires se rattache directement aux indices des prix de vente dans l'industrie 1971 = 100, qui existent pour la période 1956-1985. La note aux utilisateurs parue dans le numéro de septembre 1985 de la publication n^{O} 62-011 au catalogue *Indices des prix de l'industrie* identifiait la série équivalente la plus proche pour les séries basées sur 1971 et 1981, ainsi que le degré de comparabilité. Les facteurs de raccordement, calculés à partir de

derived from the relationship of the two series in December 1985, will also be published in the January issue of Catalogue 62-011. These link factors will not be revised. Users can obtain a continuous series on a 1971 = 100 base by consulting the July 1984 and the December 1985 issues of Catalogue 62-011 or by retrieving the data from CANSIM.

Reference Document

62-556 Industrial Product Price Indexes, 1981 = 100, Concepts and Methods, $25.00.

This publication describes the economic content of the series within the framework of the system of national accounts and describes how this affects price index methodology. Sampling and pricing methods are described as are index calculation and aggregation procedures. The relationship of the new series to its Industry Selling Price predecessor is given. Comments on index use are provided.

In the tables will be found weighting patterns for both aggregations of commodities and commodities into commodity groupings. Descriptions of the characteristics of the elemental indexes are provided. A listing is provided of nearest equivalent series in the 1981 = 100 series as they relate to the 1971 = 100 Industry Selling Price Indexes.

A glossary of terms is also provided.

la relation des deux séries en décembre 1985, paraîtront également dans le numéro de janvier de la publication n^{o} 62-011 au catalogue. Ces facteurs ne seront pas révisés. Les utilisateurs peuvent obtenir une série continue sur la base 1971 = 100 en consultant le numéro de juillet 1984 et celui de décembre 1985 de la publication n^{o} 62-011 au catalogue, ou en extrayant les données de CANSIM.

Document de référence

62-556 Indices des prix des produits industriels, 1981 = 100, Concepts et méthodes, $25.00.

Cette publication précise le contenu économique des séries dans le cadre général du système des comptes nationaux, et son impact sur la méthodologie des indices de prix. Elle contient une description des méthodes d'échantillonnage et d'observation des prix, de même que des méthodes de calcul et d'agrégation des indices. Les relations entre la nouvelle série et l'ancienne série des prix de vente dans l'industrie qui l'avait précédée s'y trouvent également. La publication contient des commentaires sur l'utilisation des indices.

Les tableaux contiennent les schémas de pondération à la fois pour les agrégats de produits et de produits en groupes. Y figurent également une description des caractéristiques des indices élémentaires ainsi qu'une liste des séries équivalentes les plus proches de la série 1981 = 100, dans la mesure où elles se rapportent aux Indices des prix de vente dans l'industrie 1971 = 100.

La publication contient également un glossaire.

RAW MATERIALS PRICE INDEXES (1981 = 100)

The Raw Materials Price Indexes measure price changes for the purchase of raw materials by Canadian industry. The term "raw material" refers either to a commodity that is sold for the first time after being extracted from nature, or a substitutable recycled product (e.g. metal scrap). For example wheat is considered as a raw material, but wheat flour is not, iron ore is but not pig iron, coal but not electricity. Approximately eighty commodities are priced in the index, grouped into seven major components.

The index and the major group indexes, on a 1981 time base, are published monthly in the Daily Bulletin approximately five weeks after the end of the reference month. They are also available at that time on CANSIM in matrix 1980.

These indexes are, to a large extent, a continuation of the previously published Raw Materials Price Indexes, 1977 = 100. The new, 1981 = 100 indexes can be linked with their equivalents in the 1977 = 100 series using the link factors which were released in the January 1986 issue and repeated in the February and March issues of this publication. Apart from the change in time and weight base, there have been some minor changes in the structure and methodology. Thus, the previous major group Textiles has been discontinued and the commodities forming it re-distributed: cotton is now a part of vegetable products and wool is a part of animal and animal products. Man-made fabrics, which did not satisfy the definition of raw materials, have been excluded from the revised index. At the same time, both the commodity samples and the samples of respondents have been revised and updated to give more reliable estimates of price movement. As a consequence some additional commodity detail is now available.

The index covers purchases of domestically produced and imported goods by Canadian industry, generally for further processing, and does not cover exports or flows of raw materials directly to final demand (principally foodstuffs). For example, potatoes bought by food processing manufacturers (for the manufacture of potato chips, or frozen french fries) are included in the index, but those bought by consumers directly are not.

As a purchasers' price index, prices should include all charges purchasers incur to bring a commodity to the establishment gate. Thus transportation charges, taxes and custom duties are all included. So also are the effects of subsidies, if any are paid to the purchaser.

While prices are ideally collected from the purchaser, there are several cases where other well known prices are used instead: for example, marketing board prices for eggs and milk, and stockyard prices for some livestock. In a few cases, where data for unprocessed materials are not available, prices are taken for a similar commodity at

INDICES DES PRIX DES MATIÈRES BRUTES (1981 = 100)

Les Indices des prix des matières brutes mesurent les variations des prix d'achat des matières brutes par les industries canadiennes. L'expression "matière brute" désigne soit un produit vendu pour la première fois après son extraction de la nature, soit un produit substitut recyclé (tel les déchets de métaux). Ainsi, le blé est considéré comme une matière brute, mais non la farine de blé, le minerai de fer mais non la fonte en gueuses, le charbon mais non l'électricité. Les prix d'environ quatre-vingt produits, regroupés en sept composantes principales, sont recueillis aux fins de l'indice.

L'indice d'ensemble et les indices des composantes principales, ayant comme période de référence 1981, sont publiés mensuellement dans le Quotidien de Statistique Canada, environ cinq semaines après la fin du mois de référence. Ces indices sont également disponibles dans la matrice 1980 de CANSIM.

Ces indices constituent, dans une large mesure, la suite des Indices des prix des matières brutes, 1977 = 100, précédemment publiés. Les nouvelles séries basées 1981 = 100 peuvent être raccordées à leurs séries équivalentes basées 1977 = 100 en utilisant les facteurs de raccordement. Ces derniers sont publiés dans le numéro de janvier 1986, et répétés dans les numéros de février et de mars 1986, de la présente publication. Outre le changement dans la période de pondération et de référence, de légères modifications ont été apportées à la structure et à la méthodologie. Ainsi, l'ancienne composante principale nommée Matières textiles a été dissoute, et les produits qui en faisaient partie ont été reclassifiés comme suit: le coton se retrouve maintenant avec les substances végétales, et la laine, avec les animaux et substances animales. Ne satisfaisant pas à la définition de matières brutes, les fibres synthétiques ont été exclues du nouvel indice. Par ailleurs, les échantillons à la fois des produits et des répondants ont été révisés et mis à jour afin d'obtenir des estimations plus fiables des mouvements de prix. En conséquence, plus de détails sont maintenant disponibles pour certains produits.

L'indice couvre les achats par les industries canadiennes de biens produits au Canada et de biens importés, en vue d'une transformation subséquente. L'indice ne couvre cependant pas les exportations, ni les matières brutes qui se rendent directement à la demande finale (principalement les denrées alimentaires). Par exemple, les pommes de terre achetées par les fabricants de produits alimentaires (pour la production de croustilles ou de pommes de terre congelées) sont pris en compte dans l'indice, alors que celles directement achetées par les consommateurs ne le sont pas.

Comme il s'agit d'un indice des prix d'achat, les prix devraient comprendre tous les frais supportés par l'acheteur pour faire parvenir le produit à la porte de l'établissement. Les frais de transport, les taxes et les droits de douane, de même que les effets de toute subvention versée à l'acheteur, sont donc incorporés aux prix.

Bien qu'idéalement, les prix sont directement recueillis auprès des acheteurs, il existe en pratique un certain nombre de cas où des prix d'autres sources bien connues soient utilisés: par exemple, les prix des offices de commercialisation des oeufs et du lait, les prix des parcs à bestiaux. Dans un certain nombre de cas où les données pour les matières non transformées ne sont

the next stage of processing as occured for some non-ferrous metals. A detailed description of the characteristics of prices for any commodity is available from Prices Division on request.

Prices collected each month are those in effect on the 15th of the month or the nearest prior business day. In a few cases, prices used are averages for the week which includes the 15th. Prices are reported directly to Statistics Canada or are taken from trade publications or from publications of other government departments.

Weights were derived from the 1981 Input/Output tables which provide values at purchasers prices of commodities purchased as intermeditate inputs. These weights are shown in the accompanying table.

Indexes for aggregates of individual raw materials are calculated according to the following formula:

$$P_{t/o}^{(agg)} = \sum_i \frac{w^i}{\sum w^i} \cdot P_{t/o}^i$$

$P_{t/o}^{(agg)}$ denotes the composite price index movement between the base period o and time t for the defined aggregate;

w^i is the transaction value of the element i in 1981;

$P_{t/o}^i$ is the price index for element i, meaning its price change from the base period to time t;

$\sum_i$ indicates summation over all elements i in the defined aggregate.

Within individual commodity indexes, the prices are weighted according to their market share in 1981 or a more recent year. In a few instances where data are not available, the price quotations are equally weighted.

For further details, please contact Prices Division, Statistics Canada, Ottawa, Ontario K1A 0T6 or telephone 613-990-9607.

pas disponibles, les prix sont prélevés pour un produit semblable à l'étape suivante de transformation. Tel est le cas notamment pour certains métaux non ferreux. La Division des prix fera parvenir sur demande une description détaillée des caractéristiques des prix d'un produit donné.

Les prix recueillis chaque mois sont ceux en vigueur le 15 du mois ou le jour ouvrable qui le précède immédiatement. Dans certains cas, les prix relevés représentent la moyenne des prix de la semaine englobant le 15 du mois. Les prix sont soit déclarés directement à Statistique Canada, soit tirés de revues spécialisées ou de publications d'autres organismes gouvernementaux.

Les pondérations furent dérivées des tableaux d'entrées-sorties de 1981, qui fournissent les valeurs aux prix d'achat des produits acquis à titre d'entrées intermédiaires. Ces pondérations sont présentées au tableau ci-joint.

Les indices pour les agrégats de matières brutes individuelles sont dégagés à l'aide de la formule suivante:

$P_{t/o}^{(agg)}$ dénote le mouvement de l'indice composite de prix entre la période de référence o et la période courante t pour l'agrégat spécifié;

w^i est la valeur de transaction de l'élément i en 1981;

$P_{t/o}^i$ est l'indice de prix pour l'élément i, c'est-à-dire son changement de prix de la période de référence o à la période courante t;

$\sum_i$ indique la sommation sur tous les éléments i faisant partie de l'agrégat spécifié.

À l'intérieur des indices individuels des produits, les prix sont pondérés selon leurs parts du marché en 1981 ou pour une année plus récente. Dans quelques cas où les données ne sont pas disponibles, les cotes de prix ont des pondérations équivalentes.

Pour plus de renseignements, veuillez contacter la Division des prix, Statistique Canada, Ottawa, Ontario, K1A 0T6, ou téléphonez au 613-990-9607.

Natural gas - Gaz naturel	3.39	7.49

ELECTRIC POWER SELLING PRICE INDEXES (NON-RESIDENTIAL), 1981 = 100

Electric Power Selling Price Indexes are published on a regional and provincial basis for two broad industrial customer categories of sales for bills less than 5000 kW and for sales of 5000 kW or more. Prices are reported by electric utilities for non-interruptible power contracts with manufacturing, service, and other Canadian industrial customers. Monthly prices are collected from all major generating and distributing utilities three times a year. The resulting indexes are released with other monthly Industry Price Indexes for April, August and December of each year. The indexes have 1981 as a time reference base and the weights used are 1981 company revenues from sales of electricty, as collected by Prices Division.

The formula used to calculate the Electric Power Selling Price Indexes is a fixed weighted index formulation, which is the same as that described in the Industry Product Price Indexes, 1981 = 100, technical notes presented above. The indexes are available on CANSIM in matrix 1979. Indexes for the current year and the previous year are subject to revision.

INDICES DES PRIX DE VENTE DE L'ÉNERGIE ÉLECTRIQUE (NON RÉSIDENTIELLE), 1981 = 100

Les indices des prix de vente de l'énergie électrique sont publiés, par région et par province, pour deux grandes catégories de clients industriels, soit les factures de moins de 5000 kW et les factures de 5000 kW et plus. Les prix sont déclarés par les services publics d'électricité pour des contrats d'énergie non susceptible d'être interrompue, conclus avec des manufacturiers, des services et d'autres clients industriels canadiens. Les prix mensuels sont relevés trois fois par année auprès de tous les grands services de production et de distribution d'énergie. Les indices établis, accompagnés d'autres indices mensuels des prix de l'industrie, sont diffusés chaque année aux mois d'avril, d'août et de décembre. Les indices ont comme période de référence 1981, et les pondérations sont fondées sur les recettes au titre des ventes qu'ont touchées les entreprises en 1981, telles que recueillies par la Division des prix.

Le calcul des indices des prix de vente de l'énergie électrique se fait à l'aide d'une formule d'indice à pondération fixe, identique à celle décrite ci-dessus dans les notes techniques des Indices des prix des produits industriels, 1981 = 100. Les indices sont disponibles par l'entremise de CANSIM sur la matrice 1979. Les indices de la présente année et de l'année précédente sont sujets à révision.

61-521

Small Business in Canada: A Statistical Profile 1981-83

If you own or manage a small business or provide services to such enterprises, this new report offers important statistical insights into the reole small business plays in the Canadian economy.

Small Business in Canada: A Statistical Profile delivers financial and operating information for small business by major industry division. Included are:

- total assets, liabilities and equity
- total revenues, profits and expenses, and
- total income generated (i.e. wages, salaries, pre-tax profits and depreciation)

Data on the number of small business and their revenues are broken down by company size (annual revenues of $10,000 to $49,999, $50,000 to $99,999, $100,000 to $249,999, $250,000 to $499,999, $500,000 to $999,999 and $1 million to $2 million), by province and by industry.

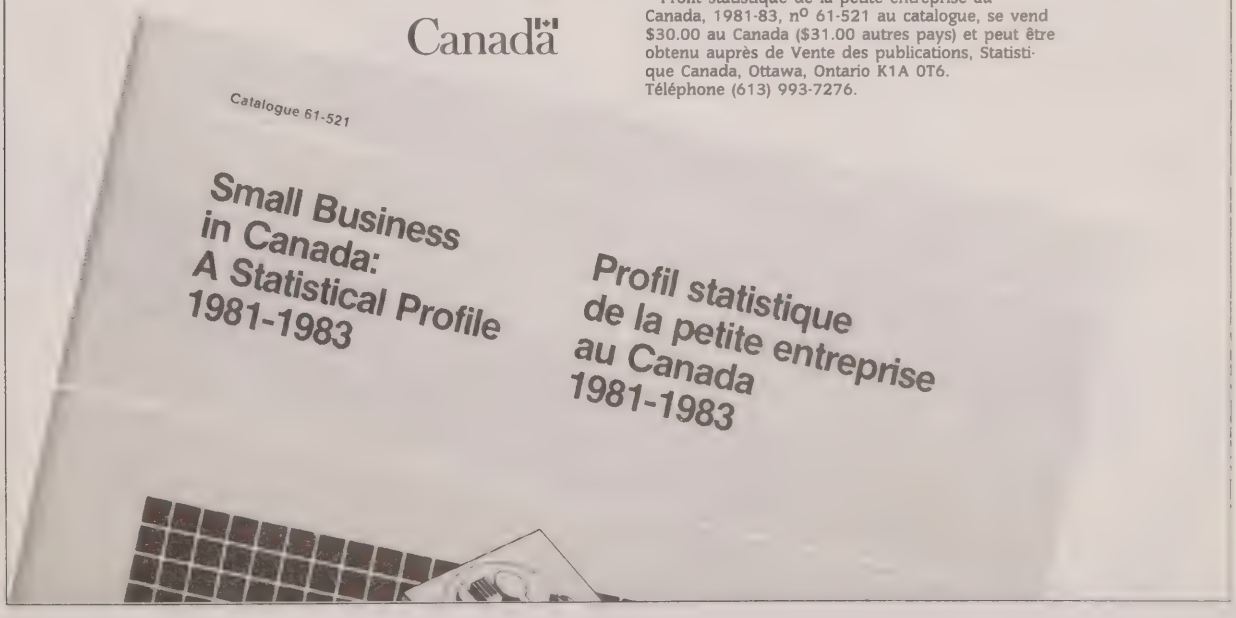
Business associations, small business managers, researchers and bank personnel will find this publication reveals the industries in which small business makes the largest impact and how that impact affects Canadian industrial output.

Small Business in Canada: A Statistical Profile, Catalogue No. 61-521, is available for $30.00 In Canada ($31.00 other countries) from Publication Sales, Statistics Canada, Ottawa, Ontario K1A 0T6. Telephone (613) 993-7276.

61-521

Profil statistique de la petite entreprise au Canada, 1981-1983

Si vous êtes propriétaire ou dirigeant d'une petite entreprise, ou si vous offrez des services à de telles entreprises, cette nouvelle publication saura bous intéresser, car elle fournit des statistiques qui vous permettront de mieux comprendre le rôle des petites entreprises dans l'économie canadienne.



Profil statistique de la petite entreprise au Canada contient des données relatives aux finances et à la gestion des petites entreprises, selon les principales branches d'activité. On y trouve donc des chiffres sur:

- l'actif, le passif et l'avoir;
- les recettes, les dépenses et les profits;
- les revenus générés (c'est-à-dire les salaires et traitements, les profits avant impôts et l'amortissement)

Les données relatives au nombre de petites entreprises et à leurs recettes sont réparties selon la tranche de recettes des entreprises (recettes annuelles de moins de $50,000, de $50,000 à $99,999 de $100,000 à $249,999 de $250,000 à $499,999, de $500,000 à $999,999 et de $1 million à $2 millions), selon la branche d'activité économique et selon la province.

Les associations commerciales, les dirigeants de petites entreprises, les chercheurs et le personnel des banques pourront connaître, à l'aide de cette publication, les secteurs de l'industrie dans lesquels les petites entreprises ont le plus d'influence, et quelles sont les conséquences de cette influence sur la production industrielle canadienne.

Profit statistique de la petite entreprise au Canada, 1981-83, nº 61-521 au catalogue, se vend $30.00 au Canada ($31.00 autres pays) et peut être obtenu auprès de Vente des publications, Statistique Canada, Ottawa, Ontario K1A 0T6. Téléphone (613) 993-7276.

Every week

The numbers that make decisions

The data that highlight national economic trends

Infomat is a digest of the most important statistics of the week. It is invaluable for business planners, policy makers and members of the media who take an interest in the Canadian economy.

Articles cite the most recent economic and social data available, describe current trends and point out significant changes. Regular features include a complete list of publications released by Statistics Canada during the reference week, a table of key economic indicators and a list of upcoming data releases. The text is concise, easy-to-read and complemented by tables and charts.

Infomat, Catalogue No. 11-002E (weekly), is available for $2.00 per copy/$100.00 annually (in Canada); $3.00 per copy/$150.00 annually (elsewhere), from:

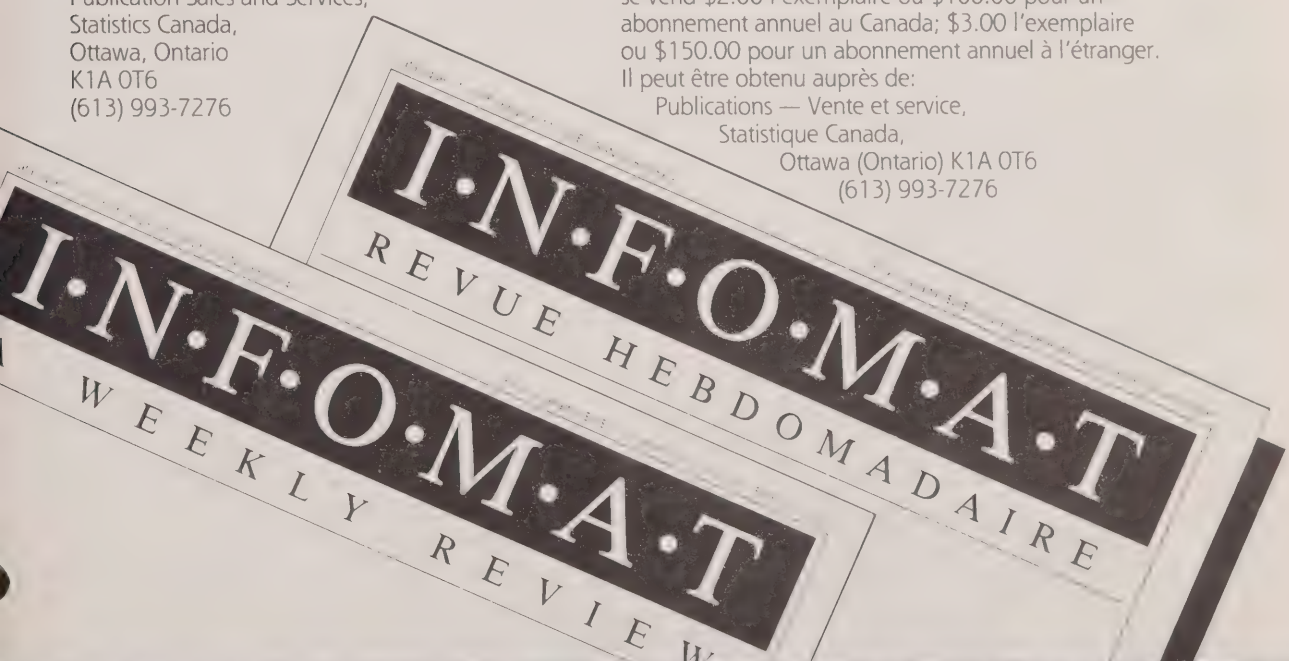
Toutes les semaines



Les chiffres qui font les décisions

Les données illustrant les tendances de l'économie canadienne

Infomat est un résumé des statistiques les plus importantes de la semaine. C'est un outil d'une valeur inestimable pour les planificateurs du monde des affaires, les responsables de l'élaboration des politiques et les médias d'information s'intéressant à l'économie canadienne.

Les articles contenus dans ce bulletin citent les plus récentes données économiques et sociales disponibles, décrivent les tendances actuelles et soulignent les changements les plus significatifs. On y retrouve des chroniques régulières, notamment une liste complète des nouvelles publications parues à Statistique Canada au cours de la semaine de référence, un tableau des principaux indicateurs économiques, ainsi qu'une liste des données à paraître. Le texte est concis, facile à lire et illustré de tableaux et de graphiques.

Infomat, n° 11-002F au catalogue (hebdomadaire), se vend $2.00 l'exemplaire ou $100.00 pour un abonnement annuel au Canada; $3.00 l'exemplaire ou $150.00 pour un abonnement annuel à l'étranger. Il peut être obtenu auprès de:

Money

How do Canadians spend it?

For a detailed account of the Canadian families' spending habits, look to **Family Expenditure in Canada, 1984.** Based on survey results of 17 major cities, 15 tables detail family spending on everything from necessities to luxury items.

You can find out how much families spent on such items as furniture, automobiles, photographic goods and services.

Survey results are categorized by family characteristics such as:

- income, • size, • city,
- class of tenure (homeowners, tenants), and more.

An essential reference for producers of consumer goods, market analysts, researchers with government agencies and social organizations.

Publications and additional information are also available from your nearest Statistics Canada Reference Centre.

L'argent

Comment les Canadiens le dépensent.

Pour obtenir des renseignements détaillés sur les habitudes de consommation des familles canadiennes, consultez **Dépenses des familles au Canada 1984.** Établie à partir d'une enquête faite dans 17 grandes villes, cette publication contient 15 tableaux qui présentent des données concernant les dépenses des familles, des choses essentielles aux biens de luxe.

Elle peut vous permettre de savoir, par exemple, quelles sont les dépenses des familles relativement à l'ameublement, à l'automobile, au matériel photographique et aux services.

Les résultats de l'enquête sont répartis selon certaines caractéristiques des familles:

- revenu, • taille, • ville de résidence,
- mode d'occupation (propriétaires, locataires), etc.

C'est un outil de référence indispensable aux fabricants de biens de consommation et aux analystes de marchés, ainsi qu'aux chercheurs oeuvrant dans les agences gouvernementales et les organismes sociaux.

Data in Many Forms ...

Statistics Canada disseminates data in a variety of forms. In addition to publications, both standard and special tabulations are offered on computer print-outs, microfiche and microfilm, and magnetic tapes. Maps and other geographic reference materials are available for some types of data. Direct access to aggregated information is possible through CANSIM, Statistics Canada's machine-readable data base and retrieval system.

How to Obtain More Information

Inquiries about this publication and related statistics or services should be directed to:

Goods and Services Producing Industries Section,
Prices Division,

Statistics Canada, Ottawa, K1A 0T6 (Telephone: 951-9607) or to the Statistics Canada reference centre in:

Highlights

Industrial Product Price Index (IPPI)

Preliminary figures indicate that the Industrial Product Price Index (IPPI, 1981 = 100) rose by 0.2% in September 1987. For a second consecutive month, the increase in the price index for petroleum and coal products was largely responsible for the monthly rise in the IPPI. The increases for the primary metal products index and the wood products index also contributed to the monthly movement in the overall index. However, these increases were partly offset by the negative impact of the appreciation of the Canadian dollar in relation to the American dollar on the price indexes for paper and paper products, as well as on the indexes for cars, trucks and other transportation equipment.

At 3.9%, the year-to-year advance in the IPPI from September 1986 to September 1987 stayed at the same level as the month before. The annual rate of change in the IPPI would have been 3.2% with the petroleum and coal-products component excluded.

The preliminary estimates indicate that the index for petroleum and coal products advanced by 1.6% in September 1987, largely as a result of the increase in fuel prices. The change in this index over twelve months thus rose to 10.5%.

The index for primary metal products rose 1.1% in September 1987, its seventh straight monthly increase. In relation to the September 1986 figure, this index was up 7.3%. In September 1987, significant increases were observed for aluminum products (6.6%), copper products (1.8%) and ferrous and non-ferrous metal scrap (3.4%). However, these increases were partly offset by the drop of 2.9% for non-ferrous metal refinery shapes.

The price index for lumber and sawmill products advanced 0.6% in September 1987, up 0.8% from September 1986. The monthly increase was primarily the result of the increases of 0.8% in prices for softwood lumber and 2.1% in prices for softwood veneer and plywood. Prices for softwood lumber rose mainly on the export markets (1.2%) and for hemlock.

The 1.2% appreciation of the Canadian dollar in relation to the American dollar was largely responsible for the decreases of 0.5% in the index for cars, trucks and other transportation equipment and of 0.2% in the index for paper and paper products. Note that any appreciation of the Canadian dollar in relation to the American dollar automatically reduces the value in Canadian dollars of export goods quoted in American currency. The negative impact of the appreciation of the Canadian dollar on the index of paper and paper products was, however, partly offset by the increases of 2.5% in prices for paperboard and 2.0% for corrugated cartons and packaging.

Faits saillants

Indice des prix des produits industriels (IPPI)

D'après les chiffres préliminaires, l'indice des prix des produits industriels (IPPI, 1981 = 100) s'est accru de 0.2% au mois de septembre 1987. Pour un deuxième mois consécutif, l'augmentation de l'indice des prix des produits du pétrole et du charbon fut en majeure partie responsable de la hausse mensuelle de l'IPPI. Les accroissements des indices des prix des produits métalliques primaires et des produits du bois ont également contribué au mouvement mensuel de l'indice d'ensemble. En contrepartie, ces hausses furent partiellement compensées par l'impact négatif de la hausse du dollar canadien par rapport à la devise américaine sur les indices des prix du papier et des produits connexes de même que sur les indices des prix des voitures, camions et autre matériel de transport.

À 3.9%, la progression annuelle de l'IPPI, de septembre 1986 à septembre 1987, s'est maintenue au même niveau que le mois dernier. En excluant la composante des produits du pétrole et du charbon, le taux de variation annuel de l'IPPI se serait établi à 3.2%.

Selon les premières estimations, l'indice des prix des produits du pétrole et du charbon a progressé de 1.6% au mois de septembre 1987, en raison principalement de la hausse des prix des carburants. La variation sur douze mois de cet indice a ainsi atteint 10.5%.

L'indice des prix des produits métalliques primaires s'est accru de 1.1% au mois de septembre 1987, pour enregistrer une septième hausse mensuelle consécutive. Par rapport à septembre 1986, cet indice s'inscrit maintenant en hausse de 7.3%. En septembre 1987, des accroissements significatifs furent observés pour les produits de l'aluminium (6.6%), du cuivre (1.8%) et les déchets de métaux ferreux et non ferreux (3.4%). Ces hausses furent cependant contrebalancées en partie par la baisse de 2.9% des profilés d'affinage de métaux non ferreux.

L'indice des prix des sciages et des produits de scierie a progressé de 0.6% au mois de septembre 1987, en hausse de 0.8% par rapport à septembre 1986. La progression mensuelle a résulté principalement des augmentations de 0.8% des prix pour le bois de construction de résineux et de 2.1% pour les placages et les contreplaqués également de bois résineux. Les prix pour le bois de construction de résineux ont surtout augmenté sur les marchés d'exportation (1.2%) et pour la pruche.

La hausse de 1.2% du dollar canadien par rapport à la devise américaine fut en majeure partie responsable des baisses de 0.5% de l'indice des voitures, camions et autre matériel de transport et de 0.2% de l'indices du papier et des produits connexes. Rappelons que toute hausse du dollar canadien par rapport à la devise américaine diminue automatiquement la valeur en dollars canadiens des biens exportés cotés en dollars américains. L'impact négatif de la hausse du dollar canadiens sur l'indice du papier et des produits connexes fut cependant compensé en partie par l'augmentation de 2.5% des prix pour les cartons et de 2.0% pour les boîtes en matières ondulées.

Highlights

Raw Materials Price Index

Preliminary estimates show the Raw Materials Price Index (RMPI, 1981 = 100) decreased 0.7% between August and September to a level of 105.9. This monthly decrease was primarily the result of a 1.7% decrease for the mineral fuels component. A 0.6% index decline for the animals and animal products component also made a significant contribution to the monthly decrease. These monthly decreases were somewhat moderated by a 1.6% increase for the non-ferrous metals component index. Over the year, the RMPI increased 13.6%, again, mainly the result of a large yearly increase for the mineral fuels component. Excluding this component, the RMPI registered no change over the month and increased 5.5% over the year. Of the seven components making up the Raw Materials Price Index, four registered decreases, two increased and one remained unchanged from the previous month.

The mineral fuels component index was estimated to have decreased 1.7% in September to a level of 99.3. Despite this monthly decrease, the index remained 26.7% higher than its year earlier level of 78.4. An estimated 2.0% decrease in crude oil prices caused the component index to drop over the month. Crude oil prices were still 35.2% higher than a year ago.

The index for the non-ferrous metals component increased 1.6% over the month to a level 17.6% higher than a year earlier. Copper prices increased 2.5% over the month to a level 23.7% higher than six months ago. The index of other base metals increased 6.6% in September. This index was 22.4% higher than its level of six months ago. Partly offsetting these monthly increases was an 8.8% drop in zinc prices.

A 0.6% decrease was registered for the animals and animal products component index in September. Over the year this index has increased 3.2%. Hog prices were down 5.5% in September to stand at a level 7.0% lower than in September 1986. The month over month decrease in hog prices was partially offset by a 3.1% increase in prices for fish. Fish prices were 16.3% higher than a year ago. Cattle and calves were up 7.0% over the year.

The vegetable products component index dropped 0.5% in September to a level of 83.7. Over the year, this index was down 3.0%. Fresh fruits dropped 5.5% over the month as a good harvest of domestic apples became available. Over the year, the fresh fruit index has dropped 3.9%. Oilseeds were 1.0% lower in September, as soybeans dropped 2.4%. Unrefined sugar prices also contributed to the component index decline as they decreased 4.3% over the month.

The wood component index only increased 0.2% in September. However, at a level of 120.3, it was 10.8% higher than in September 1986. Over the year, logs and bolts increased 15.0% while pulpwood increased 4.1%.

Faits saillants

Indice des prix des matières brutes

Selon les chiffres préliminaires, l'indice des prix des matières brutes (IPMB, 1981 = 100) a diminué de 0.7% entre août et septembre pour s'établir à un niveau de 105.9. Le recul mensuel est surtout attribuable à la baisse de 1.7% de la composante des combustibles minéraux. Le repli de 0.6% de l'indice de la composante des animaux et des substances animales a aussi grandement contribué à la baisse mensuelle. Ces pertes mensuelles ont été quelque peu compensées par la hausse de 1.6% de l'indice de la composante des métaux non ferreux. D'une année à l'autre, l'IPMB a augmenté de 13.6%, hausse encore une fois attribuable en grande partie à une progression annuelle très importante de la composante des combustibles minéraux. Si l'on exclut cette dernière composante, l'IPMB est resté stable par rapport à août, et l'augmentation annuelle a été de 5.5%. Des sept composantes de l'indice des prix des matières brutes, quatre ont accusé des baisses, deux ont augmenté et une est demeurée stable par rapport au mois précédent.

Suivant les estimations, l'indice de la composante des combustibles minéraux a diminué de 1.7% en septembre pour s'établir à 99.3%. Malgré la baisse mensuelle, l'indice est supérieur de 26.7% au niveau de 78.4 atteint il y a douze mois. Le prix des huiles minérales brutes a régressé de 2.0%, ce qui a fait chuter l'indice de la composante au cours du mois. Les prix des huiles minérales brutes sont encore supérieurs de 35.2% aux prix enregistrés il y a un an.

L'indice de la composante des métaux non ferreux a augmenté de 1.6% durant le mois pour se situer à un niveau de 17.6% supérieur à celui de l'année précédente. Les prix du cuivre se sont accrus de 2.5% pendant le mois pour s'établir àa un niveau de 23.7% supérieur à celui atteint il y a six mois. L'indice des autres métaux non ferreux a affiché une hausse de 6.6% en septembre, niveau de 22.4% supérieur à celui enregistré il y a six mois. Une baisse de 8.8% des prix du zinc a partiellement contrebalancé ces augmentations mensuelles.

En septembre, l'indice de la composante des animaux et des substances animales a diminué de 0.6%. L'indice a toutefois augmenté de 3.2% par rapport à l'année précédente. Les prix des porcs ont accusé une baisse de 5.5% en septembre pour s'établir à un niveau de 7.0% inférieur à celui atteint en septembre 1986. La baisse mensuelle du prix des porcs a été partiellement contrebalancée par l'augmentation de 3.1% des prix du poisson, ceux-ci sont 16.3% supérieurs a ceux enregistrés il y a un an. Les prix des bovins et des veaux ont augmenté de 7.0% depuis septembre 1986.

L'indice de la composante des substances végétales a diminué de 0.5% en septembre pour s'établir a 83.7. D'une année à l'autre, cet indice s'est replié de 3.0%. Les prix des fruits frais ont reculé de 5.5% au cours du mois, en raison d'une bonne récolte de pommes au Canada. L'indices des fruits frais a fléchi de 3.9% par rapport à l'année précédente. Les oléagineux ont diminué de 1.0% en septembre, le soja régressant de 2.4%. Le prix du sucre non raffiné a également contribué à la baisse de l'indice de la composante, puisqu'il a accusé une baisse de 4.3% en septembre.

L'indice de la composante du bois n'a augmenté que de 0.2% en septembre. Toutefois, il s'établit à 120.3, niveau de 10.8% supérieur à celui atteint en septembre 1986. D'une année à l'autre, les billes et les billots ont augmenté de 15.0%, et le bois à pâte a progressé de 4.1%.

(1) Revised.
(1) Révisé.
(2) The aggregation of indexes by commodities or by industries should produce the same grand total. When these totals occasionally differ due to rounding, the All Commodities Index shall be regarded as authoritative, and the All Manufacturing Industries is adjusted to match.
(2) L'agrégation des indices par produits ou par industries devraient résulter en un même grand total. Lorsque ces totaux diffèrent occasionnellement en raison de l'arrondissement, l'indice total - tous les produits devra être considéré comme celui qui fait autorité, et l'indice total - toutes les industries manufacturières sera posé égal.

TABLE 2. Industrial Product Price Indexes, by Commodity and Commodity Aggregations

TABLEAU 2. Indices des prix des produits industriels, par produits et agrégations des produits

1981 = 100
